

Permit Reference Number : BX9471IU

Operator : Tata Steel UK Ltd

Installation : Tata Steel Packaging, Trostre Works, Llanelli

Form Number : A1

Reporting of Emissions to Air for Quarter 2 (Apr – Jun 2022)

Emission Point	Substance / Parameter	Emission Limit Value	Result ^[1]	Test Method ^[2]	Sample Date and Times ^[3]	Accreditation/Certification ^[4]	Uncertainty ^[5]
A6	NOx as NO ₂	350 mg/m ³	317	ISO 10849	05 / 05 / 22		95

[1] The result given is the maximum value (or the minimum value in the case of a limit that is expressed as a minimum) obtained during the reporting period, expressed in the same terms as the emission limit value. Where the emission limit value is expressed as a time averaged value (ie hourly average during a quarterly period) , the result is given as the calculated time averaged value for that period .

[2] Where an internationally recognised standard test method is used the reference number is given. Where another method that has been formally agreed with the Agency is used, then the appropriate identifier is given. In other cases the principal technique is stated, e.g. gas chromatography.

[3] For non-continuous measurements the date and time of the sample that produced the result is given. For continuous measurements the percentage of the process operating time covered by the result is given.

[4] The accreditation status of the equipment and/or the monitoring organisation, as appropriate, for the methods used for both sampling and analysis.

[5] Refers to limits for firing on heavy fuel oil only

[6] Refers to limits for firing on natural gas only
