## **Introductory note**

***This introductory note does not form a part of the permit***

The following notice, which is issued pursuant to regulation 20 and Part 1 of Schedule 5 of the Environmental Permitting (England and Wales) Regulations 2010 S.I.2010 No. 675 (the Regulations), gives notice of the variation of an environmental permit to operate a regulated facility.

This is a minor technical variation to Table S1.2 (Operating Techniques) of the permit to reflect the Operator's intention to replace the existing reactor on Formalin Plant 1 with a new Formalin reactor and associated control system. The existing reactor is nearly 25 years old and is due for replacement. The dimensions of the new reactor will be marginally different from the old reactor but the design output is the same and there will therefore be no change to the emissions associated with the plant. Emission limits set out in the permit will continue to be met and no changes to the permit of this nature are sought. Furthermore, there will be no change to the location of the existing emission points. The control system associated with the reactor will be changed at the same time with a state-of-the-art system to provide better and more reliable control.

Schedule 1 of this notice lists any deleted conditions, Schedule 2 lists any amended conditions, Schedule 3 lists any conditions that have been added and Schedule 4 shows any changes to the plan.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
