Dyddiad/Date: 27 May 2015

Dear Keith,

**Environmental Permitting (England and Wales) Regulations 2010, as amended.
Kronospan permit EPR/BW9999IG request to extend emission limits to surface water
dated 18 May 2015.**

Variation V003 Table 4.2 Emissions to water reduced the ammonia limit from 5 to 3.5 mg/l and formaldehyde from 2 to 1.5 mg/l. It was agreed to relax the limits (back to the originals) during the lagoon project implementation subsequently extended until 30 June 2015.

The request to further extend the ammonia and formaldehyde emission limits of 5 mg/l and 2 mg/l respectively is considered acceptable to Natural Resources Wales until 31 December 2015 pending variation to include continuous monitoring and aeration of the lagoons (letters dated 9, 10 and 11 August 2011, CAR 12 March 2014 and letter dated 10 December 2014).

All other emission limit values in Table 4.2 remain unaltered, as do the monitoring and reporting requirements.

Yours sincerely

Ian Oakes
