Eich cyf / Your ref: KB/IO/06

Dyddiad/Date: 30 December 2015

Dear Keith,

**Environmental Permitting (England and Wales) Regulations 2010, as amended.  
Kronospan permit EPR/BW9999IG request to extend emission limits to surface water  
dated 14 December 2015.**

Variation V003 Table 4.2 Emissions to water reduced the ammonia limit from 5 to 3.5 mg/l and formaldehyde from 2 to 1.5 mg/l. It was agreed to relax the limits (back to the originals) during the lagoon project implementation subsequently extended until 31 December 2015 (letter dated 27 May 2015)

The request to further extend the ammonia and formaldehyde emission limits of 5 mg/l and 2 mg/l respectively is considered acceptable to Natural Resources Wales until 31 July 2016 pending variation (now submitted) to include new aerators and floating reed bed rafts in all three lagoons.

All other emission limit values in Table 4.2 remain unaltered, as do the monitoring and reporting requirements.

Yours sincerely

Ian Oakes
