Our ref: SPMP review
Date: 20th September 2017

Dear Mr Zachary,

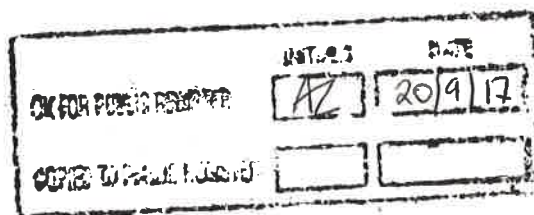

A review of the site SPMP was carried out on the 29th August 2017. This review covered the operations for Synthite Ltd and TS Resins Ltd as the site now has a common SPMP.

There are no changes to the SPMP submitted to you in October 2015. A review of the data collected has shown that there are no significant deviations from historical data for any of the boreholes tested, indicating that the site is in control of environmental impacts.

We intend to retest boreholes MWD1 (opposite TS Resins operations) and BH9 (off-site to the southeast) in 3 months rather than 6 months (one off) to clarify the results. Borehole MWD1 showed a slightly elevated nitrogen reading compared to the previous result (still lower than historical results) and BH9 will be tested to follow up a request from Chiara Caserotti.

Yours sincerely,

Greg Hickman
