No action required.

3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

Site visit was undertaken on Tuesday the 14th of June, accompanied by Kevin Singleton, the Fishery Manager for the site. Spoke to site director, Jonathan Bird, on the phone during the visit.

Weather conditions were hot and sunny, with little rain over the preceding days.

The treatment system involves a seasonal soakaway and a discharge to watercourse at ST 09701 71479.

The discharge was not flowing during the site inspection, and there was no odour or

evidence of sewage material around the outlet. There was a low flow within the watercourse, the stream bed around the discharge appeared grey, this could be a result of the stagnant water.

Action: monitor the discharge outlet, particularly following large events, to identify any environmental impact.

Mr Bird informed stated that the the sewage treatment system was emptied and maintained annually by O K Environmental Services Ltd, however no records of this available (waste transfer notes).

Action: retain records of treatment system servicing for 6 years.

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.
