

Schedule 1 - Notification of abnormal emissions

This page outlines the information that the Operator must provide to satisfy conditions 5.1.1 and 5.1.2 of this Permit.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the PPC Regulations.

Part A

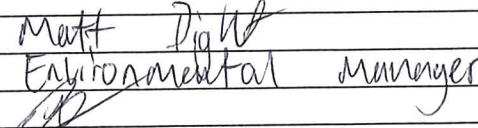

Permit Number	AP3433ES
Name of Operator	2 Sisters Red Meat t/a St Merryn Foods
Location of Installation	Merthyr Tydfil
Location of the emission	W1 discharge point
Time and date of the emission	17/05/2018

Substance(s) emitted	Media	Best estimate of the quantity or the rate of emission	Time during which the emission took place
Mineral Oils and Hydrocarbons	Surface Water	6.6mg/l	17/05/2018

Measures taken, or intended to be taken, to stop the emission	Emission detected after the date of emission. Drainage verification survey booked with GPT to allow complete surface water system review.
---------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------

Part B

Any more accurate information on the matters for notification under Part A.	Emission due to a previously identified fault in the W1 interceptor. This had been repaired in 2017 to allow time for a replacement interceptor to be designed.
Measures taken, or intended to be taken, to prevent a recurrence of the incident	Drainage Verification survey booked. This will determine options for the interceptor's replacement.
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment or harm which has been or may be caused by the emission	Booms have been in place downstream of the W1 sampling point, at the site boundary. These will have prevented any pollution or harm from this emission.
The dates of any unauthorised emissions from the installation in the preceding 24 months.	03/05/18 – Emission of low pH effluent 01/05/18 – Emission of 900kg of R448a to air 22/02/18 – W1 Emission of Mineral oil and hydrocarbon and suspended solids 08/02/18 – W1 Emission of Mineral oil and hydrocarbon and suspended solids 23/09/17 – Contractor HGV collision resulting in fuel spill 13/04/17 – W1 Emission of Mineral oil and hydrocarbon 30/03/17 – S1 Emission of Mineral oil and hydrocarbon 02/03/17 – W1 Emission of Mineral oil and hydrocarbon
