---	---	-----------------------

Q1-2022 Landfill Groundwater Sampling Results

The impact of bulk storage of materials on the landfill and its performance was monitored in quarter 1 of 2022 and the results shown in this report.

The quarterly sampling plan satisfies both SPMP (Site Protection and Monitoring Programme) and Landfill licence requirements (ref URS design of a site monitoring programme, 44382681, July 2006 and Dow Silicones UK landfill CMS review, 49310733, October 2008).

This report provides sample results for boreholes and surface water bodies. They have been assessed for copper and Trimethylsilanol (TMS) concentrations.

- The boreholes are ~~LF1, LF4, LF6~~, LF7, ~~E1s, E1m, E1d, E2s, E2d, E4s, E4d~~, 210, 312, 412, A2d, LF10S, LF10M, LF10D, LF11S, LF11M, LF11D, LF12S, LF12D, ~~LF13S, LF13M, LF13D, LF14S~~, LF14M, LF14D, ~~CP1S, CP1M~~, CP1D, ~~CP2S~~, CP2M, CP2D
- The surface water bodies are Cadoxton pond (North), Cadoxton pond (South), Freshwater pond, Cadoxton River SW2, Cadoxton River SW3 and the Timber Pond.

The graphs illustrated have been prepared from borehole and surface water samples taken for Q3-2007 up till Q1-2022

The following boreholes were lost and are no longer sampled – but the historical data is still in this report for reference. Alternative boreholes were added in 2016 & 2018 to provide additional data because of the unavailability of these ones: E1s, E1m, E1d, E2S, E2D, E4S, E4D, LF1, LF4, LF6, LF13S, LF13M, LF13D.

Some of the boreholes were not sampled during Q1 2022 due to being inaccessible, due to being unable to draw a sample or having been lost during the capping work on the landfill. These were: LF11S, LF12S, CP1S, CP1M, CP2S. These boreholes show no results on the charts.

Comments

1. Most results from the sampling this quarter fall within the normal range of the sampling data.
- 2.. The only borehole which measured a significant value for copper was A2d. This borehole is situated in the middle of the site and therefore poses no risk to local sensitive receptors. The value is of similar magnitude to other reporting periods.

Comments

1. No boreholes show significant TMS concentrations this quarter.
2. The results of sampling the boreholes shows the usual fluctuations.

The next report is to be completed for the next 6months.
