Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

This variation is primarily for an increase to the installation boundary for the relocation of the existing swarf storage area. It also includes a new building for swarf storage with associated drainage that connects to the existing process site drains.

This variation also includes an NRW led change to correct a drafting error in 'Section 4 Reporting' of the permit where a condition references the wrong table.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
