Subject: Requested Lancing Activity at the Mineral Site

Good morning Gareth,

As per 'Section 2.3.7' of CELSA's Melt Shop TP3639BH Environmental Permit: 'The operator shall obtain written agreement from Natural Resources Wales prior to any lancing of steel pieces outside the lancing booth.'

Please be advised that we wish to undertake the above activity at the stocking area of the Mineral Site for a period of approx. six weeks, starting on Friday 21st September. Large pieces of metal are not safe to manoeuvre into the booth and therefore will need to be part cut to enable transfer. This has been requested by HARSCO. An oxy lance will be used to undertake this activity. There will be minimal environmental impact as any associated emissions will be contained within the site boundary.

If you wish to discuss further, please do not hesitate to contact me.

Regards,

Richard
