Reporting of emissions to air for the period from 01/01/22 to 31/12/22

Emission Point	Substance / Parameter	Emission		Reference Period	Result ^[1]	Test Method ^[2]	Sample Date and Times ^[3]	Uncertainty ^[4]
		Limit Value						
A1	Particulate Matter	50 mg/m ³		1 hour period	3.5 mg/m ³	BS EN 13284-1	01/11/22 11:19 to 11:49	0.82
A2	Particulate Matter	50 mg/m ³		1 hour period	5.7 mg/m ³	BS EN 13284-1	01/11/22 10:35 – 11:05	1.0

The result given is the maximum value (or the minimum value in the case of a limit that is expressed as a minimum) obtained during the reporting period, expressed in the same terms as the emission limit value. Where the emission limit value is expressed as a range, the result is given as the 'minimum – maximum' measured values. Where an internationally recognised standard test method is used the reference number is given. Where another method that has been formally agreed with the Agency is used, then the appropriate identifier is given. In other cases the principal technique is stated, e.g. gas chromatography. For non-continuous measurements the date and time of the sample that produced the result is given. For continuous measurements the percentage of the process operating time covered by the result is given. The uncertainty associated with the quoted result at the 95% confidence interval, unless otherwise stated.

NRW were informed of the breach in permit levels for TSS. The site drainage system has been assessed and modifications are planned to return to compliance.

Operator's comments:

Liquid waste has gone up due to attenuation tank needing emptying. Bund has been emptied more frequently.
