

REPORTING OF ENERGY CONSUMPTION

Reporting Period (Year)2022.....

FORM E1
2 JULY 2004
ENERGY
PAGE 1 OF 1

Operator: **Dunbia (UK)**
Permit Number: **BU8002**
Location: **Crosshands**

Energy Source	Annual Energy Consumption	
	Energy Used (MWh)	
Electricity	11,130.3	
Natural Gas	6,041.47	

Comments:

There has been a decrease in Electricity usage in comparison to last year due to the decrease in production tonnage. During the Summer months, electricity increases through the refrigeration and is lower during the Winter months. Alongside projects that have run throughout the year, the site has been working to reduce this usage. Projects such as LED lighting and line shut down audits continued. The site electric transformer was replaced in November 2022 with a newer more efficient transformer this has demonstrated reduction of approx. 2% which is expected to continue to show impact into 2023.

The Gas usage has decreased since last year, mainly due to the decrease in cooked product being produced. Gas usage continues to be monitored as part of weekly site KPIs.

Signed on behalf of Operator by  Print name...Lewis Elsey..... Date...30/01/2023.....
