Dear Mr Davies

MARINE AND COASTAL ACCESS ACT 2009: PART 4 – MARINE LICENSING

LICENCE FOR PWLL SEA WALL MAINTENANCE

LICENCE NUMBER: CML2280

I am writing to advise you that the Marine Licensing Team, on behalf of the Welsh Ministers, as Licensing Authority, has considered your application, dated **25 November 2022** for a Marine Licence under Part 4 of the Marine and Coastal Access Act 2009, and hereby grant a Marine Licence for you to undertake the above stated works.

Accordingly, please find attached for your review and retention a copy of Marine Licence **CML2280** and its conditions.

Advisory Note

Marine Licence, **CML2280**, constitutes a statutory consent; therefore the conditions set out herein must be complied with in full and will be binding upon any agent or contractor who undertakes any activity on the project on your behalf.

You are urged to read the conditions of Marine Licence **CML2280** carefully, in particular the need to advise Welsh Government Marine Enforcement Officers of the commencement of works within **10 days** prior to work starting.

Marine Licence, **CML2280** is solely granted for the work to be undertaken at Pwll, on the River Lougher; however, it does not absolve you from applying for further consents or licences as necessary to enable the full completion of your project.

If the works authorised by this Licence are unlikely to be completed by the expiry date, the Licence Holder should apply for a replacement marine licence **at least 4 months** prior to the expiry date of this Licence.

Should you require clarification as to the reasons for the inclusion of any of the conditions attached to the Licence then you must request written notice within 28 days of the receipt of this letter.

Please note that the port, local council and Trinity House should be informed if any of the existing groyne markers or other aids to navigation in the area are affected.

The Welsh Archaeological Trust have noted that remnants of prehistoric peat and submerged forest (PRN 31318) has been recorded in the inter-tidal zone alongside the wall. The HER record reads as follows: *Peat shelf and submerged forest extending in a long narrow strip, badly eroded and truncated by present alignment of the Loughor channel. Few stumps surviving, better preservation towards the western end whereby there are a few horizontal trunks. Dense concentrations of mussels cover the majority of the exposure.*

This is recorded at NGR SN48000064, although is likely to extend along the full stretch of the works, and these deposits could be exposed at low tide. The Welsh Archaeological Trust are uncertain how the wall will be accessed from the seaward side or whether these deposits extend into the area of proposed works. You should therefore be aware of the archaeological potential and that all possible measures are put in place to avoid impacting it. We would strongly recommend you engage with the Welsh Archaeological Trust prior to commencement of any Licensed Activities by contacting Mike Ings M.Ings@DYFEDARCHAEOLOGY.ORG.UK.
