Morning Julian,

Please find the XYZ File attached – we’ve been lucky that the bathymetric contractor has been so receptive to our requests – (UK Dredging – part of AB Ports) – as our design team asked for differing formats too.

If you require any additional info, then don’t hesitate in contacting us.

Thanks

Dear Nick,

Many thanks, that is extremely helpful. If possible, data as an XYZ file would be great, as that is the preferred option for long term archiving.

Yours

Julian

Good Afternoon Julian,

Thanks for the quick response and glad everything looks ok from your side.

I've attached the bathymetric survey data (DWG File) we had conducted in November – if you need it in another format then please let me know (also have data in an 'XYZ File').

Kind Regards

Nick Donnison BSc FGS

You don't often get email from julian.whitewright@rcahmw.gov.uk. [Learn why this is important](#)

Dear Nick,

Thanks for emailing. I can confirm that I have checked the coordinates that you have provided against the scheduled area of the wreck of the Louisa and they are all clear, so no objections from our part on that front.

Thanks also for including such a detailed set of mapping, in particular, the bathymetry survey, including the Louisa is very instructive, and I was wondering if we might be able to have a copy of the data to add to the National Archives for the site. This would enhance our knowledge of it in line with the Welsh National Marine Plan policy Soc05, as well as providing some really useful baseline info for ongoing monitoring and management of the site.

Yours

Julian

Subject: Channel View Footbridge, River Taff, Cardiff

Good Afternoon,

As part of the marine licence application process it recommends that I contact yourselves to ensure that the proposed scheme (Channel View Footbridge) will not disturb/damage/destroy any archaeological assets in the area and seek any additional advice from your organisation.

We do know that there is the shipwreck of the Louisa located near to the west riverbank – this can be seen/has been positively identified on the bathymetric survey.

Arcadis has been contracted to carry out a ground investigation to obtain geotechnical and geo-environmental data to facilitate design and construction of the new Channel View Footbridge in the River Taff in Cardiff.

As part of the ground investigation it is proposed that we carry out 3no. boreholes across the River Taff - this will be carried out via the use of a drilling rig on a pontoon or jack-up. The other locations are situated in 'The Marl' and 'Hamadryad Park' to the east and west of the River Taff.

Please see document attached which includes the exploratory hole plan, a copy of the bathymetric survey and coordinates of the proposed exploratory hole locations.

If you require any additional information then please let me know.

Kind Regards

Nick Donnison BSc FGS
