Attn: Mr David Willey

Dear David

RE: DP3733BK - DOCKSWAY DISPOSAL SITE. LATEST AREA 2 GAS MONITORING RESULTS, ROUND 175.

We write to provide the latest gas monitoring report for Area 2 of Docksway Disposal Site. Gas monitoring is required on a quarterly basis at Area 2 of Docksway Disposal Site, in accordance with the Environmental Permit EPR/DP3733BK.

We enclose with this report data sheets showing the results collected in September 2018 (i.e. Round 175).

Gas monitoring wells are installed at approximately 100m intervals around the Area 2 landfill perimeter and there are currently fifteen available monitoring wells. Fifteen wells were monitored during Round 175.

Trigger Levels

Trigger Levels for all the Area 2 wells are shown on the attached data tables.

Results Summary

The methane and carbon dioxide concentrations recorded at each of the gas monitoring wells in September 2018 are summarised on the attached data sheets.

The concentrations of methane and carbon dioxide did not exceed the well specific trigger levels at the majority of the Area 2 wells monitored during round R175. The exception to this is GP09_18 which recorded both peak (32.6%v/v) and steady state (32.1%v/v) methane concentrations that exceed the trigger level (1.0%v/v). The exploratory wells GP09_18A, 18B and 18C that were installed surrounding GP09_18 also indicate elevated concentrations of methane, but at significantly varying concentrations. The cause of the elevated methane at this location is currently unknown and under ongoing investigation.

Concluding Remarks

In general, it is considered that the results obtained from this round of gas monitoring are within the range of results obtained since commencement of monitoring with the exception of GP09_18 where elevated methane concentrations have been recorded for the last 24 months and investigations are ongoing.

NCC will continue to undertake Area 2 perimeter gas monitoring on a quarterly basis and PBA will continue to provide factual reports to NRW on a quarterly basis.

Yours sincerely
