4. Details of our assessment

The camp site had only just re-opened for the season. The sewage treatment on site consists of package treatment plant, pumping station, reed bed and soakaway.

The pumping station was running as designed and was fitted with an alarm. No issues observed with soakaway and no odours observed on site.

Advice was provided regarding the use of cleaning chemicals on site and the permit holder stated that only environmentally friendly products are used. The tank is regularly emptied on a rolling contract and had been serviced prior to the new season opening of the campsite.

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.
