SD	Pwllfawatkin Annual Performance Report 2022	31/01/2023	Final	2

The information contained within this report is submitted in accordance with Condition 4.2.1 of the Permit BU8819IV, relating to the performance of the activities over the previous year, 2022.

4.2.1 (c) Energy consumed at the site

(d) Water consumed at the site

Table S4.1 Energy and water consumed at the site.

Parameter	Frequency of assessment	Annual total	Unit
Potable water use	Annually	2,736*	Cubic metres
Energy used (including for leachate treatment)	Annually	23,217	MWh of electricity
Non potable water use	Annually	3000	Cubic metres

* metered for 5 months then estimated (council damaged meter so based on 5 month average for year)

4.2.1 (e) Annual production/treatment

Table S4.2 Annual production/treatment.

Leachate: Disposed of off site; Disposed of to any onsite effluent treatment plant; Recirculated into the waste mass.	Cubic meters/year 20,316 0 0
Surface water and/ or groundwater: Disposed of off site; Disposed of to any onsite effluent treatment plant.	Cubic meters/year Not recorded 0
Landfill gas: Combustion in flares; Combustion in gas engines; Other methods of gas utilisation.	Normalised cubic meters/year 963,019 4,875,175 None

SD	Pwllfawatkin Annual Performance Report 2022	31/01/2023	Final	3

4.2.1 (f) Contamination or decontamination of the site

There was no contamination nor decontaminator of site during the year 2022.

4.2.1 (g) Topographical surveys required by condition 3.6.3

states 'A topographical survey of the site referenced to ordnance datum shall be carried out:

(a) annually, and

(b) prior to the disposal of waste in any cell or new development area of the landfill, and

(c) following closure of the landfill or part of the landfill.

SITE	ANNUAL PLAN DRAWING REFERENCE
Pwllfawatkin	479A483 (Plan 2) – Annual Site Plan

4.2.1 (h) Volumetric difference (reported in cubic metres) between the most recent topographical survey and the previous annual topographical survey

VOLUMETRIC DIFFERENCE as at 31/12/21
79,183 m ³

4.2.1 (i) Assessment of the settlement behaviour of the landfill body

Settlement monitoring points have been established on the restored areas of the site to ensure settlement behaviour of the waste in the landfill site is recorded.

The selected points will be monitored at a minimum time period of once a year, but it is envisaged that the frequency is likely to increase to three times a year in newly capped areas. For reference purposes the settlement monitoring point locations will be marked on the "Settlement Monitoring Plan" as listed below.
