Section 1 – Compliance Assessment Summary

This is based on the requirements of the permit under the Environmental Permitting Regulations or the licence under the Water Resources Act 1991 as amended by the Water Act 2003. A detailed explanation is captured in "Compliance Assessment Report Detail" (Section 2) and any actions you may need to take are given in the "Action(s)" (section 4). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

Permit conditions and compliance summary	**CCS Category**	**Condition(s) breached**
KEY: See Section 5 for breach categories, suspended scores will be indicated as such. **A** = Assessed or assessed in part (no evidence of non-compliance), **X** = Action only, **O** = Ongoing non-compliance, not scored.		

Number of breaches recorded	**0**	**Total compliance score** (see section 5 for scoring scheme)	0

If the Number of breaches recorded is greater than zero, please see Section 3 for our proposed enforcement response

Section 2 – Compliance Assessment Report Detail

This section contains a report of our findings and will usually include information on:

- The part(s) of the permit that were assessed (eg. Maintenance, training, combustion plant, etc)
- Where the type of assessment was 'Data Review' details of the report/results triggering the assessment
- Any non-compliances identified
- Any non-compliances with directly applicable legislation
- Details of any multiple non-compliances
- Information on the compliance score accrued inc.
- Details of advice given
- Any other areas of concern
- Any actions requested
- Any examples of good practice
- A reference to photos taken

A compliant inspection, however the following needs to be addressed.

You have an Oil Storage Tank located after a shed on the yard within 10 mtrs of a surface water drain. As discussed on site the tanks must be compliant with the **Control of Pollution (Oil Storage) (Wales) Regulations 2016.** Existing tanks at significant risk (i.e. facilities that are located within 10 metres of any surface water or wetland, or 50 metres of a borehole or well) will have to comply with the regulations immediately.

It was discussed moving or replacing the tank. Please be aware, the double skinned tank in its current location does not comply with the regulations as it will not provide secondary containment. The tank will need a containment system that can prevent the escape of material (oil) to aquatic environment in the event of failure of the primary storage container. Effective secondary containment will include ancillary equipment as well as the storage tank. This means all pipes, valves etc should also be inside the secondary containment facility. The bund must have walls impermeable to water and oil and have a capacity of not less than 110% of the oil container's storage capacity.

Alternatively, you may wish to purchase a fully compliant oil storage tank which has double-bunding and all ancillary equipment within the structure, therefore not requiring secondary containment.

You stated you wish to comply and will do the necessary work for this. Please can you let me know what you have decided to do no later than the 21 March 2019.

Thank you for your time during the audit.

Section 3 – Enforcement Response

You must take immediate action to rectify any non-compliance and prevent repetition.
Non-compliance with your permit conditions constitutes an offence and can result in criminal prosecutions and/or suspension or revocation of a permit. Please read the detailed assessment in Section 2 and the steps you need to take in Section 4 below.

Section 4 – Action(s)

This section summarises the actions identified during the assessment along with the timescales for when they will need to be completed.

See Section 1 above			

Section 5 – Compliance notes for the Operator

To ensure you correct actual or potential non-compliance we may

- Advise on corrective actions verbally or in writing
- Require you to take specific actions verbally or in writing
- Issue a notice
- Require you to review your procedures or management system
- Change some of the conditions of your permit
- Decide to undertake a full review of your permit

Any breach of a permit condition is an offence and we may take legal action against you

- We will normally provide advice and guidance to assist you to come back into compliance either after an offence is committed or where we consider that an offence is likely to be committed. This is without prejudice to any other enforcement response that we consider may be required.
- Enforcement action can include the issue of a formal caution, prosecution, the service of a notice and/or suspension or revocation of the permit.

See our Enforcement and Civil Sanctions guidance for further information

This report does not relieve the site operator of the responsibility to

- Ensure you comply with the conditions of the permit at all times and prevent pollution of the environment
- Ensure you comply with other legislative provisions which may apply
