OUR DECISION

Based on all the information available, and having regard to all relevant considerations NRW has decided to grant the marine licence sought by the Application subject to the conditions set out in Annex 1.

This decision document:

- explains how the application has been determined, having regard to the relevant legal framework outlined in section 4;
- provides a record of the decision-making process; and
- sets out the reasons for any conditions imposed in connection with any marine licence granted pursuant to the Application.

1 APPLICATION DETAILS

1.1 The Application

Applicant Name and Address	The Applicant is the organisation set out below: Organisation name: Gloucestershire County Council Address: Shire Hall, 6th Floor, Bearland, Gloucester, GL1 2TH
Application Reference Number	CML2317
Date Application was duly made	05 April 2023
Proposal[s] covered by the application	Maintenance works to Brockweir Bridge piers (the Project)
Licensable marine activities	Construction, alteration or improvement of works in or over the sea or on or under the sea bed (the Proposed Activities)
Marine Plan area	Welsh inshore region and Welsh offshore region
Application documents:	CML2317 - PA614-TW-DRG-RCAST-ST-00001 P01 - Brockweir Bridge Pontoon - 08 March 2023 CML2317 - 5533 - MS - Ringway Gloucester - Brockweir Bridge - Lower Section of Piers - 08 March 2023 CML2317 - CC Infrastructure - Brockweir Bridge – MS - 08 March 2023 CML2317 - Method Statement - 08 March 2023 CML2317 Coordinates - 04 April 2023 CML2317 - band-1-application-form for revisit updated - 27 April 2023

Application Number: CML2317

APPLICATION PROCEDURE

1.2 The Application

The Application was accepted by Natural Resources Wales (**NRW**) and considered duly made on 05 April 2023. This means we considered it was in the correct form and contained sufficient information for us to begin our determination, but not that it necessarily contained all the information we needed to complete that determination, and the documents considered may therefore include documents provided after the Application was first made.

1.3 Documents considered

In reaching its decision, NRW has considered the documents listed in section 1 of this decision document along with such other information provided by the Applicant that NRW considered relevant.

1.4 Commercial Confidentiality

The Applicant made no claim that any information forming part of the Application was subject to commercial confidentiality and we have not received any information in relation to the Application that appears to be commercially confidential.

1.5 Notice

As required by s. 68 of the Marine and Coastal Access Act 2009 (the 2009 Act), notice was given to Monmouthshire County Council on 12 April 2023. NRW considered that notice of this application should not be published.

2 BASIS FOR OUR DECISION

In determining this application, including the terms on which it was granted, and the conditions attached to it, NRW has had regard to the factors set out in section 4 below in accordance with the **Marine and Coastal Access Act 2009** (the **2009 Act**).

Under the 2009 Act NRW is required to have regard to the following:

- the need to protect the environment (see section 3.1)
- the need to protect human health (see section 3.2)
- the need to prevent interference with legitimate uses of the sea (see section 3.3)
- in the case of an application for a licence to authorise construction, alteration or improvement of works within the UK marine licensing area, the effects of any use intended to be made of the works in question when constructed, altered or improved (considered, if relevant in sections 3.1 to 3.5 below)
- any representations which it has received from any person having an interest in the outcome of the application. (summarised in section 3 and where relevant considered in sections 3.1 to 3.5 below)
- such other matters as it thinks relevant (see section 3.5 below)

2.1 The need to protect the environment:

The reference to the “environment” includes the local and global environment; the natural environment; and, by virtue of section 115(2) of the 2009 Act, any site of historic or archaeological interest. The natural environment may include the physical, chemical and biological state of the sea, the sea-bed and

Application Number: CML2317

the sea-shore, and the ecosystems within it, or those that are directly or indirectly affected by an activity, whether within the marine licensing area or otherwise.

In considering the need to protect the environment we have in particular considered the relevant environmental legislation set out below.

2.1.1 Water Framework Directive, Groundwater Directive and Water Environment Regulations 2017

a) The legal framework

The Water Environment (Water Framework Directive) (England and Wales) Regulations 2017 (Water Environment Regulations) implement the requirements of the Water Framework Directive (WFD) (Directive 2000/60/EC) which requires that proposals for development that would worsen the status of a body of water, or jeopardise its attainment of 'good' surface water status should be rejected.

Under the Water Environment Regulations, NRW must exercise its relevant functions so as to ensure compliance with the requirements of the WFD, the Environmental Quality Standards Directive (Directive 2008/105/EC) and the Groundwater Directive (Directive 2006/118/EEC).

b) Factors relevant to our determination

NRW has considered the potential effect of the Proposed Activities on the following WFD waterbodies:

- Wye – GB530905415406

The works will involve like for like maintenance (repainting) which is listed as a green activity under Annex D. Furthermore, the applicant has declared a series of mitigation measures and adopted a suitably designed methodology which, when coupled with the standard pollution prevention measures included as part of the licence, will minimise the potential for adverse effects on the waterbody.

NRW is therefore satisfied that the Proposed Activities when considered alone and in-combination, will not pose a risk to deterioration in the status of any of the above listed waterbodies or jeopardise their attainment of good surface water status when undertaken in accordance with appropriate conditions.

2.1.2 Biodiversity and resilience of ecosystems duty

a) The legal framework

Section 6 of the **Environment Wales Act 2016** requires that we seek to maintain and enhance biodiversity in the exercise of our functions, and in so doing promote the resilience of ecosystems, in a manner that is consistent with the proper exercise of our functions.

b) Factors relevant to our determination

NRW is satisfied that in this case, we have taken into account and had due regard to this duty in so far as it is consistent with the function of determining an application for a Marine Licence under the Marine and Coastal Access Act 2009.

2.1.3 European Protected Sites and Ramsar Sites

a) The legal framework

European sites are those designated under the Conservation of Habitats and Species Regulations 2017 (**Habitats Regulations 2017**) and the Conservation of Offshore Marine Habitats and Species Regulations 2017 (**Offshore Habitats Regulations 2017**) as Special Protection Areas (SPAs) and Special Areas of Conservation (SACs).

Application Number: CML2317

The Habitats Regulations 2017 and the Offshore Habitats Regulations 2017 require that any project that is likely to have a significant effect on a European site or a European offshore marine site (either alone or in combination with other plans or projects) must be subject to an appropriate assessment. NRW undertakes a Habitats Regulation Assessment (HRA) to establish whether an appropriate assessment is required.

In addition NRW must exercise its functions under the 2009 Act so as to secure compliance with the requirements of the relevant European Directives. NRW also has a duty under the Habitats Regulations 2017 to support wild birds by protecting habitats and avoiding pollution.

A Ramsar site is a wetland which has been designated under the Ramsar Convention. The Ramsar Convention does not place specific legal requirements on its parties, however Ramsar status is considered by NRW as a matter of policy in its decision-making.

b) Factors relevant to our determination

The Project is located in the following European Protected Site:

- River Wye SAC

And is hydrologically connected to the following European Protected sites:

- Severn Estuary SAC
- Severn Estuary SPA

The Project is hydrologically connected to the following Ramsar Site:

- Severn Estuary Ramsar

The ecological status of the watercourse is a major determinant of favourable conservation status (FCS) for all features associated with the protected sites listed above. Pollutants can adversely affect water quality, thus detrimentally impacting the ecological status of the waterbody and, in turn, its features, particularly mobile fish species of the SAC and Ramsar sites.

The applicant has declared a series of mitigation measures and adopted a suitably designed methodology which, when coupled with the standard pollution prevention measures included as part of the licence, will minimise the potential for adverse effects on the waterbody.

Following consultation with NRW, it was noted that there was potential for the works to disturb otter and that this impact pathway should be considered within the HRA. However, given that the works are short in duration, and that no works will be taking place at night, it was concluded that there would be no adverse effect to the otter feature of the River Wye SAC.

Further information regarding this assessment can be found within the HRA document entitled "CML2317 HRA".

NRW is satisfied that the Proposed Activities, either alone or in combination with other plans or projects, will not adversely affect the integrity of European Site(s) when undertaken in accordance with appropriate conditions.

NRW is satisfied that any impacts of the Proposed Activities on the Ramsar site are not sufficient to justify refusal of the application when implemented in accordance with appropriate conditions.

2.1.4 Marine Conservation Zones

a) The legal framework

Application Number: CML2317

Marine Conservation Zones (MCZ) were established under the 2009 Act to protect nationally important, rare or threatened habitats and species. The only currently designated MCZ in Wales is Skomer.

Under the 2009 Act, NRW must exercise its functions in the manner which it considers best furthers the conservation objectives stated for any MCZ or, where that is not possible, in the manner which it considers least hinders the achievement of those objectives.

b) Factors relevant to our determination

NRW is satisfied that there is no significant risk of the Proposed Activities on the Skomer MCZ when undertaken in accordance with appropriate conditions.

2.1.5 Sites of Special Scientific Interest (SSSIs)

a) The legal framework

Sites of Special Scientific Interest are designated under the Wildlife and Countryside Act 1981 (**1981 Act**) and protected by law to conserve their wildlife or geology. NRW must take reasonable steps, consistent with the proper exercise of its functions, to further the conservation and enhancement of the flora, fauna or geological or physiographical features by reason of which an SSSI is of special scientific interest.

b) Factors relevant to our determination

The applicant has declared a series of mitigation measures and adopted a suitably designed methodology which, when coupled with the standard pollution prevention measures included as part of the licence, will minimise the potential for adverse effects on the waterbody.

The Environment Team will be issuing a separate SSSI assent.

NRW is therefore satisfied that the Proposed Activities do not impact on:

- River Wye (Lower) SSSI

when undertaken in accordance with appropriate conditions.

2.1.6 The Waste (England and Wales) Regulations 2011

a) The legal framework

The Waste (England and Wales) Regulations 2011 (as amended) establish a legal framework for treating waste. This is designed to protect the environment and human health by emphasising the importance of proper waste management, recovery and recycling techniques to reduce pressure on resources and improve their use. Waste generated by a project or activity must in general terms be dealt with in an environmentally friendly way. To achieve this the Regulations describe a waste hierarchy which gives an order of preference for how waste is dealt with (prevention, re-use, recovery for other purposes such as energy, and finally disposal).

b) Factors relevant to our determination

The applicant noted within their methodology that the floating pontoons used to access the piers will be covered using 3mm ply-board and then a geotextile membrane to capture any paint flakes or debris. This will act as a filter allowing the water from the rinsing process to pass through, capturing any contaminated waste.

Before any washing or blasting works commence, a temporary encapsulation utilising heras fencing and visquin sheeting will be erected. Blasting works will be carried out utilising garnet, which is a mineral based media, and any spent media will be collected, bagged, loaded into a hoist, before being moved to the top of the structure for disposal as contaminated lead waste.

Application Number: CML2317

NRW is therefore satisfied that the Proposed Activities meet the requirements of The Waste (England and Wales) Regulations 2011 when undertaken in accordance with appropriate conditions.

2.1.7 Other matters considered relevant to the need to protect the environment

IN SUMMARY, having considered the need to protect the environment, including the matters set out in 3.1.1 to 3.1.6 and all other matters relevant to the need to protect the environment, NRW does not consider that any impacts of the Project on the environment (either alone or in combination with other plans or projects) are sufficient on their own to justify refusal of the application provided that the Proposed Activities are implemented in accordance with the conditions set out in Annex 1.

2.2 The need to protect human health

IN SUMMARY, having considered the need to protect human health, NRW does not consider that any impacts of the Project (either alone or in combination with other plans or projects) are sufficient on their own to justify refusal of the application provided that the Proposed Activities are implemented in accordance with the conditions set out in Annex 1.

2.3 The need to prevent interference with legitimate uses of the sea

Legitimate uses of the sea include (but are not limited to): navigation (including taking any steps for the purpose of navigational safety); fishing; mineral extraction; and amenity use.

IN SUMMARY, having considered the need to protect interference with legitimate uses of the sea, NRW does not consider that any impacts of the Project (either alone or in combination with other plans or projects) are sufficient on their own to justify refusal of the application provided that the Proposed Activities are implemented in accordance with the conditions set out in Annex 1.

2.4 Marine Policy Documents

a) The Legal framework

NRW is required to take its decision in accordance with the appropriate marine policy documents unless relevant considerations indicate otherwise:

UK Marine Policy Statement 2011 (MPS)

The MPS is the framework for preparing Marine Plans and taking decisions affecting the marine environment.

Welsh National Marine Plan (WNMP)

The WMNP is the Marine Plan for the Welsh inshore region and the Welsh offshore region and sets out the Welsh Government's policies for and in connection with the sustainable development of this area.

b) Our determination

This decision has been taken in accordance with marine policy as set out in the MPS and the WNMP.

2.5 Other matters NRW thinks relevant

2.5.1 Well-being of Future Generations (Wales) Act 2015

a) The legal framework

Application Number: CML2317

In making its decision, NRW is required to take all reasonable steps to meet its published well-being objectives, which are designed to maximise NRW's contribution to achieving each of the well-being goals set out in the Well-being of Future Generations (Wales) Act 2015. NRW must also act in accordance with the principles of sustainable development.

b) Our determination

NRW has taken into account its well-being objectives and is satisfied that its decision is consistent with meeting those objectives.

NRW is also satisfied that its decision is consistent with the sustainable development principle i.e. seeking to ensure that the needs of the present are met without compromising the ability of future generations to meet their own needs.

2.5.2 Sustainable management of natural resources**a) The legal framework**

NRW's general purpose is to pursue the sustainable management of natural resources in relation to Wales and applying the principles of sustainable management of natural resources as set out in section 4 of the Environment (Wales) Act 2016, so far as consistent with the proper exercise of its functions.

b) Our determination

NRW is satisfied that this decision, when implemented in accordance with the attached conditions, is consistent with its general purpose of pursuing the sustainable management of natural resources in relation to Wales, and applying the principles of sustainable management of natural resources.

2.6 Conclusions and Recommendations

Based on all the information available, and having regard to all relevant considerations, NRW's decision is to grant the Marine Licence sought by the Application. We have reached this decision having had regard to the relevant legal framework outlined in section 4 and have also explained in section 4 how each of the legal requirements have been considered. NRW has determined that a Marine Licence for the Proposed Activities should be granted.

Conditions have been attached to the Marine Licence as set out in Annex 1. The reason for the inclusion of each condition is set out with the conditions.

Application Number: CML2317

AUTHORISATION

Report by: Jack Thompson Position: Permitting Officer	Date: 27 April 2023	Signed: 
Authorised by: Emmer Litt Position: Permitting Team Leader	Date: 28 April 2023	Signed: 

ANNEX 1

Conditions imposed and reasons for those conditions.

Note: Condition numbers used below reflect the condition numbers used in the licence.

CONDITIONS

Notification and Inspection

3.1 Notification of Commencement

- 3.1.1** The Licence Holder must notify the Licensing Authority no less than **5 days** before the commencement of the Licensed Activities, or an individual phase of the Licensed Activities, is expected to commence.

Reason: To ensure the Licensing Authority are aware of the commencement of Licensed Activities.

- 3.1.2** The Licence Holder must notify Welsh Government Marine & Fisheries Division (Control & Enforcement Branch) no less than **5 days** before the commencement of the Licensed Activities, or an individual phase of the Licensed Activities, is expected to commence.

Reason: To ensure the Marine Enforcement Officers are aware of the commencement of Licensed Activities.

- 3.1.3** The Licence Holder must ensure that local mariners and fishermen's organisations are made fully aware of the Licensed Activities through local notices to mariners **5 days** prior to the commencement of the Licensed Activities.

Reason: To minimise interference with other sea users and ensure other vessels in the vicinity can safely plan and conduct their passage.

3.2 Notification of Agents/Contractors/Sub-Contractors

The Licence Holder must ensure that details of any agent(s), contractor(s) or sub-contractor(s) utilised to undertake the Licensed Activities are submitted to the Licensing Authority at least **24 hours** prior to the commencement of Licensed Activities.

Reason: To ensure that the Licensing Authority are made aware, in a timely manner, of the agent(s), contractor(s) or sub-contractor(s) operating under this licence and in order to enable the Licensing Authority to comply with the reporting obligations in the Marine Licensing (Register of Licensing Information (Wales) Regulations 2011 as amended.

3.3 Notification of HM Coastguard

The Licence Holder must ensure that HM Coastguard is made aware of the Licensed Activities at least **24 hours** prior to commencement by contacting The National Maritime Operations Centre at **zone27@hmcg.gov.uk**.

Reason: To ensure the safety of navigation.

3.4 Notification of Vessels and/or Vehicles

The Licence Holder must ensure that the details of the vessels and/or vehicles utilised to undertake the Licensed activities are submitted to the Licensing Authority and Welsh Government Marine & Fisheries Division (Control & Enforcement Branch) at least **24 hours** prior to the commencement of the Licensed Activities.

Reason: To ensure that the Licensing Authority are made aware, in a timely manner, of the vessels and/or vehicles operating under this licence to enable the Licensing Authority to comply with the reporting obligations in the Marine Licensing (Register of Licensing Information (Wales) Regulations 2011 as amended.

3.5 Inspection of Licensed Activities

The Licence Holder must allow Marine Enforcement Officers or any other person authorised by the Licensing Authority to inspect the Licensed activities at any reasonable time.

Reason: To allow for inspection of the Licensed Activities to check compliance with the Licence.

3.6 Notification of Completion

- 3.6.1** The Licence Holder must notify the Licensing Authority within **10 days** of completion of the Licensed Activities.

Reason: To ensure the Licensing Authority are aware of the completion of Licensed Activities.

- 3.6.2** The Licence Holder must notify the authorised Welsh Government Marine & Fisheries Division (Control & Enforcement Branch) within **10 days** of completion of the Licensed Activities.

Reason: To ensure the Marine Enforcement Officers are aware of the completion of Licensed Activities.

3.7 Accident or Emergency

- 3.7.1** If, by reason of force majeure any substances or articles are deposited otherwise than as permitted as part of the Licensed Activities or in the Licensed Area full details of the circumstances shall be notified to the Licensing Authority within **48 hours** of the incident occurring.

Reason: To allow the Licensing Authority to take appropriate action to ensure the appropriate removal of the unlicensed deposit.

- 3.7.2** If it is necessary for the Licence Holder to recover or remove any equipment, plant or machinery used to undertake the Licensed Activities that have been dropped as a result of an accident or emergency, the Licence Holder is permitted to do so provided that the methodology for such recovery or removal has been approved by the Licensing Authority.

Application Number: CML2317

Reason: To allow the Licensing Authority to take appropriate action to ensure the appropriate removal of the unlicensed deposit.

3.8 Distribution of Copies of this Licence

The Licence Holder is required to ensure that a copy of this Licence and any special conditions thereto is given to:

- All agent(s), contractor(s) and sub-contractor(s) whose names have been provided to the Licensing Authority pursuant to condition 3.2; and
- The Masters of any vessels and transport managers responsible for the vehicles employed in the pursuance of this Licence whose details have been submitted to the Licensing Authority pursuant to condition 3.4.

Reason: To ensure that all agent(s), contractor(s), sub-contractor(s) and vessel Masters are aware of their obligations under the conditions established within this Licence to ensure compliance with the conditions.

3.9 Inspection of Documents

Copies of this Licence shall be made available at the following locations:

- at the address of the Licence Holder specified in section 1.2;
- at any site office, located at or adjacent to the Licensed Area, used by the Licence Holder or its agent(s), contractor(s) or sub-contractor(s) responsible for the loading transportation or deposit of any substances or articles permitted as part of the Licensed Activities;
- on board each vessel or vehicle carrying out Licensed Activities.

The documents referred to in this Condition shall be available at all reasonable times for inspection by officers appropriately authorised by the Licensing Authority and authorised Marine Enforcement Officers at the locations stated in that paragraph.

Reason: To ensure that all agents, contractors, subcontractors and vessel Masters may access the details of this Licence at all times and to ensure that the details of this Licence are available for inspection when required.

Vessels, Plant and Equipment

3.10 Notified Contractors, Vessels and/or Vehicles only to Carry out Licensed Activities

Only those agent(s), contractor(s), sub-contractor(s), vessels and/or vehicles whose details have been notified to the Licensing Authority may operate under the terms of this Licence. Any changes must be notified to and be approved by the Licensing Authority in writing prior to any such agent(s), contractor(s), sub-contractor(s) vessels or vehicles carrying out any Licensed Activities pursuant to or otherwise operating under this Licence.

Reason: To ensure that the Licensing Authority are made aware, in a timely manner, of the agent(s), contractor(s), sub-contractor(s) operating under this Licence to enable the Licensing

Authority to comply with the reporting obligations in the Marine Licensing (Register of Licensing Information (Wales) Regulations 2011 as amended.

3.11 Refuelling of Plant and Equipment

The Licence Holder must ensure that plant, vehicles and machinery are not refuelled on the foreshore or in the sea.

Reason: To minimise the risk of fuels/other contaminants entering the marine environment.

3.12 Equipment, Structures and Access

The Licence Holder must ensure that all equipment, temporary structures, access tracks, waste and/or debris associated with the Licensed Activities are removed on completion of the Licensed activities.

Reason: To minimise impacts on the marine environment and other users of the sea/seabed.

Safety

3.13 Removal of Deposited Material

If the Licensing Authority considers it necessary or advisable for the safety of navigation, the Licence Holder must remove any deposit specified by the Licensing Authority or Marine Enforcement Officers within one month of notice being given by the Licensing Authority, and not shall not replace such material until the Licensing Authority has given its written approval.

Reason: To ensure that any material which may pose a hazard to safe navigation has been removed.

Pollution control

3.14 Pollution Prevention

The Licence Holder must ensure that pollution prevention best practice is adhered to at all times. Any incidents must be reported to the Licensing Authority as soon as possible using the hotline number **0300 065 3000**.

Reason: To minimise the risk of pollution incidents and to ensure the timely report of such incidents to enable the Licensing Authority to take action as appropriate.

3.15 Spillage of Pollutants

The Licence Holder must employ bunding, storage facilities and spill kits to contain and prevent the release of fuel, oils and chemicals associated with the plant, refuelling and construction equipment into the marine environment. Secondary containment must be used with a capacity of **no less than 110%** of the container's storage capacity.

Reason: To minimise the risk of fuels/other contaminants entering the marine environment.

3.16 Coatings

Application Number: CML2317

The Licence Holder must ensure that any coatings/treatments used in carrying out the Licensed Activities are suitable for use in the marine environment and are used in accordance with best environmental practice.

Reason: To ensure hazardous chemicals that may be toxic, persistent or bio-accumulative are not released into the marine environment and to minimise the risk of marine pollution incidents by adopting best practice techniques.

3.17 Prevention of Disposal of Man-made Debris

The Licence Holder must ensure that all reasonable precautions are taken to prevent the disposal of man-made debris to the marine environment. Such material must be removed immediately and be disposed of appropriately. If it is not possible to prevent manmade debris from entering the marine environment during the Licensed Activities, the Works must cease immediately.

Reason: To minimise the amount of man-made materials disposed of at sea.

3.18 Cleanliness of Equipment

The Licence Holder must ensure that equipment, machinery and PPE are washed with freshwater and/or thoroughly airdried before deployment and before moving between locations.

Reason: To minimise the risk of spread of invasive non-native species.

Activity-specific conditions

3.19 Scaffolding and Access Towers

3.19.1 The Licence Holder must ensure that safe and normal navigation is not impeded by the use of scaffolding or access towers while carrying out the Licensed Activities.

Reason: To ensure that the Licensed Activities do not interfere with safe navigation.

3.19.2 If as a result of the use of scaffolding or access towers there is a potential risk to navigation, or the navigational channel is reduced (including height) the Licence Holder must consult with the MCA and Trinity House to agree appropriate mitigation measures.

Reason: To ensure that the Licensed Activities do not interfere with safe navigation.

3.20 Sand or Grit-blasting

The Licence Holder must ensure that, if sand- or grit-blasting is undertaken as part of the Licensed Activities, no waste material arising from this process is discharged into the marine environment.

Reason: To avoid release of waste into the marine environment and to minimise the risk marine pollution incidents.

3.21 Construction, Alteration or Improvement – Returning to Original Profile

Except where the Licensed Activities authorise the profiling of any part of the Licensed Area, the Licence Holder must ensure the Licensed Area is returned to the original profile, or as close to the original profile as reasonably practicable, following the completion of the Licensed Activities.

Reason: To minimise impact to sensitive receptors and to ensure safety of navigation.

Sensitive Area Conditions

3.22 Vehicular Access

The Licence Holder must ensure that vehicular access across coastal habitats that form part of the interest features of a Sensitive Area, is not used unless specified in the Sensitive Area Method Statement.

Reason: To minimise the impact to the features of interest of a Sensitive Area.

3.23 Equipment and Materials

The Licence Holder must ensure that any equipment or materials used do not enter the marine environment within the interest features of a Sensitive Area, unless specified in the Sensitive Area Method Statement.

Reason: To minimise the impact to the features of interest of a Sensitive Area.
