1. Summary of our findings (full details in section 4)

| Part of permitted activity assessed (criteria) | Assessment result | Permit condition |
|---|-------------------|------------------|
| WQ-C1 - Emissions and monitoring - Emissions to water | Assessed (A) | |

Result types are explained in more detail in the 'Important Information' section below.

2. What action is required?

No action required.

3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

Initial reporting of the SPS, CSO and rainfall trends from the 12-14th March showed non-compliant discharge from SPS, likely due to possible groundwater infiltration.

Further investigation and reports of the SPS wet well and CSO EDM now suggest that the discharge was within compliance. When the trend for the SPS is added to its own graph, it reaches 100% and discharges over the wet weather period.

Please keep us informed with the outcome of the infiltration survey

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.
