Correspondence welcomed in Welsh and English

## Schedule

1. In relation to the reduced flow volume from the W1 emission point to the River Tawe, please provide a revised assessment of all emission parameters described in Table S3.2 of permit reference BL4567IZ/V008 using the Environment Agency's guidance [Surface water pollution risk assessment for your environmental permit](#)
2. In relation to the introduction of sodium to the waste water treated in the onsite Effluent Treatment Plant, please provide an assessment of the risk to the River Tawe from emissions of sodium via the W1 emission point. This assessment should include a comparison of expected discharge concentrations against background sodium concentrations in the River Tawe and take into consideration the impact of plume effects from the emission point.
