Dear Sir/Madam,

**Environmental Permit Variation Application: Padeswood Works**  
**Permit ref. EPR/BL1096IB**

On behalf of our client Castle Cement Limited (trading as Hanson Cement) please find attached a permit variation application to include for the upgrade to the existing Clinker Dome dust filter and associated monitoring requirements for A11 in Table S3.2 of the permit, and also for the addition to the permit for a new surface water discharge point 'W3' at Padeswood Works.

This variation application is in response to Actions required by NRW Compliance Assessment Report (CAR) ref. CAR\_NRW0040097, dated 14/06/2022, specifically Action 11 which requires the Operator to apply for a permit variation to include the emission point to surface water from the horseshoe ditch around the coal shed.

This application is considered to be a minor technical variation, for which the fee is £1,311. The Operator has requested NRW to call them in order to take payment over the phone, as per previous permit applications. Please call Mr Stewart Mitchell on 07773 318 884 or 01244 550 330 and he will pay by credit card. The working out of this total fee is provided in the Supporting Document for this application.

I trust the application is in order but please contact me if you need any further information or have any queries regarding this.

Yours sincerely,

*Samantha Hayden*
