	Private sewer	Private sewer subject to Sect. 104 adoption agreement	Private Sewer Transfer	Lateral Drain	Inspection Chamber		

#### Notes:

Whilst every reasonable effort has been taken to correctly record the pipe material of DCWW assets, there is a possibility that in some cases pipe material (other than Asbestos Cement or Pitch Fibre) may be found to be asbestos cement (AC) or Pitch Fibre (PF). It is therefore advisable that the possible presence of AC or PF pipes be anticipated and considered as part of any risk assessment prior to excavation.

Dŵr Cymru Cylindrig (the Company) gives this information as to the position of its underground apparatus by way of general guidance only and on the understanding that it is based on the best information available and is not a warranty as to its correctness or relied upon in the event of excavations or other works made in the vicinity of the company's apparatus. This issue of working apparatus before carrying out any excavations made entirely on site. The information which is supplied by the Company is done so in accordance with statutory requirements of sections 195 and 196 of the Water Industry Act 1991 which is based upon the best information available and, in particular, but without prejudice to the generality of the foregoing, it should be noted that the records that are available to the Company may not disclose the existence of a water main, service pipe, sewer, lateral drain or drainage main and any associated apparatus laid before 1 September 1990, or if they do, the particular threat (including their position underground) may be inaccurate. It must be understood that the furnishing of this information is entirely without prejudice to the provision of the new Roads and Street Works Act 1991 and the Company is not liable to compensate for any damage to the apparatus or to the property.

Service pipes are not generally shown but their presence should be anticipated.
