Subject: RE: Llŷr Project FLiDAR Location

Good afternoon James.

Thankyou for the information on the Llŷr FLiDAR location options. We have looked over this and the preference would be the southernmost option as illustrated on the routing of tankers by course chart . We feel that this would be the most viable option owing to the high number of transits in the areas of the other two considered locations.

Kind Regards,

Vaughan.

Good afternoon All,

Thanks again for your time last week to discuss changes to the Llŷr Project.

As an action from last week's meeting we have selected three potential locations for deployment of the FLiDAR for the Llŷr Project, all located within the Offshore Project Boundary. A shapefile containing these locations is provided at the link below alongside a couple of traffic related figures for context.

 [Potential FLiDAR Locations](#)

For completeness, the coordinates of the three potential locations are provided below:

| Latitude (WGS84) | Longitude (WGS84) |
|------------------|-------------------|
| 51° 21' 48.12" N | 005° 26' 51.55" W |
| 51° 20' 44.60" N | 005° 29' 33.84" W |
| 51° 18' 14.66" N | 005° 27' 29.64" W |

Noting the urgency with which the project team wishes to deploy the FLiDAR we would greatly appreciate if you could provide any feedback and preferences for the potential locations by the end of this week – Friday 30th June.

Any questions or further information needed just let us know.

Thanks,

James Milne
