Report Suspicious

Good afternoon Robyn

Do you have any update on the below following the workshop?

Unfortunately we are unable to place applications on hold for more than a couple of weeks. Therefore, if you are not in a position to advertise the public notice at this time, we would recommend that you withdraw your application or we will have to refuse it based upon not being non-compliant with the process.

If you can provide me with an update then we can work out the best way forward.

Many thanks  
Seran

Hi Seran,

I just wanted to follow on from the below discussions, Jay (cc'd) has been in contact with Maria Alvarez this morning and has provided an update on the FLIDAR ML application and the cause of the delay of the public consultation to pass on to the wider team. Please let me know if the meeting Monday is still required following this update once received.

Thanks again,  
Robyn

Good morning Robyn

Would you be available to have a Teams call with me to discuss the below? I have good availability this morning, otherwise I am free on Monday after 10:30?

Many thanks  
Seran

Good morning Seran,

Thank you for the below email.

Due to some unexpected delays, we have had to pause on the publication of the public notice for the FLiDAR application. Noting that this delays the start of the public consultation period, please can we place this application on hold, and if so, how long can we place a hold on this for?

Many thanks in advance for your help on this, and apologies for the delay.

Robyn

Good morning Robyn

As per my email below, I have not received notification from yourselves with regard to the publication of the public notice and therefore the start of the public consultation period. As we cannot issue a licence until the public notice has concluded, this is now holding up your application as we have completed our statutory consultation period.

Please can you provide me with evidence of publication as soon as possible otherwise we may have to place your application on hold.

Kind regards  
Seran

Good morning Robyn

Your application and supporting information are currently being consulted on for an initial period of 28 days with those bodies who we consider relevant and to have an interest in the proposed works in light of their environmental responsibilities. Please be aware following the initial 28 day consultation, additional information may be required to determine the application which will be consulted on.

In accordance with Section 68 (1) of the Marine and Coastal Access Act 2009, you are required to place a notice of the works, at your own expense, in a local newspaper or maritime publication that has a wide circulation in the area of where the works are to take place. I have attached a translated copy to this email. This will discharge our obligation to ensure that affected parties are given an opportunity to comment on the proposed works.

You will need to send us a copy for our records of the advertised public notice, clearly displaying the date of publication (a scanned copy will suffice). Please send as soon as possible so we can align our website with the consultation dates.

The public notice must be placed once with the 28 days beginning from the date of publication.

Please note that we cannot issue a licence until the public notice period has concluded.

Should any representations be received on your application, we will of course give you the opportunity to comment on them.

In the meantime, should you have any queries please do not hesitate to contact me.

Kind regards  
Seran

All received with thanks Robyn.

We now consider your application to be duly made complete as of Monday 27<sup>th</sup> March 2023. I am awaiting the translated newspaper advert to be returned from our translation team and will email to yourself once received so you can begin the process of advertising the public consultation period.

Kind regards  
Seran

Subject: RE: DEML2316- Deployment of floating LIDAR station

Dear Jackie Hill and Robyn Jones

I can confirm that the marine licence application for the floating LIDAR deployment at the Llyr FLOW location has now been processed by our Permit Receipt Centre and has been passed to the Marine Licensing Team. The Application has been assigned reference number DEML2316 and I have been assigned as your Case Officer. I can also confirm that your payment is now showing on our system.

From my initial checks of your application I note the following:

Company Number for Cierco Ltd is missing from the Application form. I have looked them up myself on Companies House Register but have been unable to ascertain which number to use as there are several Cierco Ltd companies registered to the address you have provided. As we need to confirm the Applicant is a legal entity (and also because we include the company number on any marine licence issued) please can you provide this information?

Please address the point above in order to complete the application. If the point above has not been addressed within 10 working days then your application will be returned and refunded.

Please be aware: As part of the application process you will be required to place an advert at your own expense, in a local newspaper or maritime publication that has a wide circulation in the area of where the works are to take place. The advert will be emailed to you once your application is deemed complete.

Please be aware that our service level for non EIA projects is 4 months/grab sampling is 6 weeks/EIA and more complex proposals may take significantly longer to determine from the date of receiving a completed application.

If you have any further queries please do not hesitate to contact the team via return email.

Kind regards  
Seran

Dear Dr Hill

**Acknowledging your application**

**Operator: Cierco Ltd**  
**Facility: Llyr Flow**

Thank you for your application received 6<sup>th</sup> March 2023

Please note, our determination process will assess all relevant material relating to your application and a decision cannot be reached until that process is completed. For certain applications we also undertake technical and public consultations. Once we have completed our determination, we will then decide whether we can permit/licence what you have applied for. If we refuse your application, we'll explain why.

If you should wish to discuss anything in respect of this application, please contact the Marine Licensing team, at [marinelicensing@naturalresourceswales.gov.uk](mailto:marinelicensing@naturalresourceswales.gov.uk)

Yours sincerely
