21st June 2023

Dear Karen

Kronospan Limited Permit Variation Application (PAN-021028) Schedule 5 Request

I refer to your second schedule 5 request dated 20th June 2023.

1. Document "S2376-0030-0005RSF Dispersion Modelling Assessment for 2023 EP Variation_r2" has been submitted to correct the typographical error stated in the original document, when the emission point A33 [Dryer No. 4 WESP21 Particleboard Emergency Stack] was stated, rather than A32 [WESP 21 Unit Stack (Chip Dryer No. 4 and exhaust from particleboard)].

To clarify;

Kronospan is submitting this variation application to:

Change the NOx ELV from A32 (WESP21) from the permitted 100mg/Nm3 to 200mg/Nm3

2. Document "S2376-0260-0001HKL Supporting Information_r2" has been submitted to correct the typographical error stated in the air quality section (4.1) of the original document, when the emission point A33 [Dryer No. 4 WESP21 Particleboard Emergency Stack] was stated, rather than A32 [WESP 21 Unit Stack (Chip Dryer No. 4 and exhaust from particleboard)].

The corrected documents along with this letter should satisfy the schedule 5 request.

Yours Sincerely,

Chris Emery
