

**Notice of request for more information**

Environmental Permitting (England and Wales)  
Regulations 2016

## Notice requiring further information

To: Chris Emery  
Kronospan Limited  
Maesgwyn Farm  
Chirk  
Wrexham  
LL14 5NT

Application number: PAN-021028

Natural Resources Wales, in exercise of its powers under paragraph 4 of Part 1 of Schedule 5 of the above Regulations, requires you to provide the information detailed in the attached schedule. The information is required in order to determine your application for a permit, dated 06/03/2023. The information requested should be sent to the following address by 21/06/2023.

Information should be sent to:

Permitting Service  
Natural Resources Wales  
Cambria House

## Schedule

1. A Formaldehyde (CH<sub>2</sub>O) ELV of 5 mg/m<sup>3</sup> for the combined emissions from A5, A6 and A31 has been used in your consultants modelling. This reflects the existing ELV's for these processes. You state " it is proposed that the emissions from emission points A5 and A6 would be ducted to the WESP 32 and this would be used for the abatement of emissions from the paper impregnation and resin plants rather than the existing wet scrubbers." It should be noted that your existing Environmental Permit has an ELV of 15 mg/m<sup>3</sup> for CH<sub>2</sub>O for A28 (WESP 32). If a CH<sub>2</sub>O ELV of 15 mg/m<sup>3</sup> is intended, then the assessment should be amended to reflect this. I therefore wish to make you aware based on the information an ELV of 5mg/m<sup>3</sup> for CH<sub>2</sub>O will be applied to emission point A28 (and A31). If this was not your intention please can you confirm otherwise. The table below shows the existing ELV's for ease of reference.

Parameter (Limit including unit mg/Nm <sup>3</sup> )	Emission Point			
	A28	A31	A5	A6
Particulate Matter	15	15	20	20
Formaldehyde	15	5	5	5
Total Volatile Organic Compounds	100	100	30	30

2. Furthermore the TVOC limit on A1 (following the LVOC BRef review) is now the same as A5 and A6 at 30mg/Nm<sup>3</sup>. It is proposed that the limit on A28 (and A31) will also change to 30mg/Nm<sup>3</sup>. Please can you also confirm if this will be problematic.

End of schedule
