Odour report form		Date: 13.09.22
Location and time of test/observation	Approved route, 7.07	
Weather conditions: <i>Dry, rain, fog, snow, etc.</i>	Dry,	
Temperature: <i>Very warm, warm, mild, cold, freezing</i>	11 C	
Wind strength: <i>None, light, strong, gale, steady, gusting</i>	Flat calm	
Wind direction <i>e.g. from NW</i>	SE (according to weather station but flat calm observed)	
Intensity <i>See below</i>	Level 1	
Duration of test	15 mins	
Constant or intermittent: <i>What is the persistence of the odour</i>	No Sensient odours were detected.	
What does it smell like	Slight cabbage/hot rubber noted on main road to south of Fishery	
Receptor sensitivity	Low	
Is the source evident	No	
Other comments or observations	Deep inversion, mist to the top of the valley. Mist was not moving	
Report by: <i>Print name clearly, sign and date</i>	Tim Pink	Signature: Date: 13.09.22

Intensity 0 No odour 1 Very faint odour 2 Faint odour	3 Distinct odour 4 Strong odour 5 Very strong odour 6 Extremely strong odour	Receptor sensitivity Low (footpath, road) Medium (industrial or commercial workplaces) High (housing pub/hotel etc)
---	---	---

Odour report form		Date: 21.09.22
Location and time of test/observation	Site roads walk at 13.50	
Weather conditions: <i>Dry, rain, fog, snow, etc.</i>	Sunny	
Temperature: <i>Very warm, warm, mild, cold, freezing</i>	18C	
Wind strength: <i>None, light, strong, gale, steady, gusting</i>	2 mph	
Wind direction <i>e.g. from NW</i>	S	
Intensity <i>See below</i>	All odours "observed" were level 1	
Duration of test	20 mins	
Constant or intermittent: <i>What is the persistence of the odour</i>	Several odours were detected, these odours were very local to the source	
What does it smell like	Humin near waste trailer (Level 1) very localised. Multiple discrete and very localised (10m) odours in middle lane, Meaty, sweet sickly and HVP. Air v still in middle lane (level 1)	
Receptor sensitivity	Low	
Is the source evident	Humin trailer, HVP area, Volac roller door middle lane open	
Other comments or observations	Odours detected were the normal odours expected from the site, due to the low intensity and the discrete nature of the odours it is not likely that they would be detectable away from the site.	
Report by: <i>Print name clearly, sign and date</i>	Tim Pink	Signature: Date: 21.09.22

Intensity 0 No odour 1 Very faint odour 2 Faint odour	3 Distinct odour 4 Strong odour 5 Very strong odour 6 Extremely strong odour	Receptor sensitivity Low (footpath, road) Medium (industrial or commercial workplaces) High (housing pub/hotel etc)

Odour report form		Date: 15.07.22
Location and time of test/observation	Site boundary walk at 15.30	
Weather conditions: <i>Dry, rain, fog, snow, etc.</i>	Partially cloudy	
Temperature: <i>Very warm, warm, mild, cold, freezing</i>	19C	
Wind strength: <i>None, light, strong, gale, steady, gusting</i>	11 mph	
Wind direction <i>e.g. from NW</i>	NNW	
Intensity <i>See below</i>	All odours "observed" were level 1	
Duration of test	20 mins	
Constant or intermittent: <i>What is the persistence of the odour</i>	Several odours were detected, these odours were very local to the source	
What does it smell like	Humin near waste trailer (Level 1) localised, Mixed Topnotes/oleoresins goods in yard (level 1) Some wood odour noted in goods in yard likely to be from Biomass plant. (level 1)	
Receptor sensitivity	Low	
Is the source evident	General flavour manufacture, bulk wood storage.	
Other comments or observations	Odours detected were the normal odours expected from the site, due to the low intensity and the discrete nature of the odours it is not likely that they would be detectable away from the site.	
Report by: <i>Print name clearly, sign and date</i>	Tim Pink	Signature: Date: 15.07.22

Intensity 0 No odour 1 Very faint odour 2 Faint odour	3 Distinct odour 4 Strong odour 5 Very strong odour 6 Extremely strong odour	Receptor sensitivity Low (footpath, road) Medium (industrial or commercial workplaces) High (housing pub/hotel etc)

Odour report form		Date: 15 th July 22
Location and time of test/observation	Approved route, 16:00	
Weather conditions: <i>Dry, rain, fog, snow, etc.</i>	Partially cloudy	
Temperature: <i>Very warm, warm, mild, cold, freezing</i>	19 C	
Wind strength: <i>None, light, strong, gale, steady, gusting</i>	8mph	
Wind direction <i>e.g. from NW</i>	NNW	
Intensity <i>See below</i>	N/A	
Duration of test	15 mins	
Constant or intermittent: <i>What is the persistence of the odour</i>	No Sensient odours were detected.	
What does it smell like	Hedge row and Farm odours only	
Receptor sensitivity	High	
Is the source evident	N/A	
Other comments or observations	Normal odours only detected, nothing offensive.	
Report by: <i>Print name clearly, sign and date</i>	Tim Pink	Signature: Date: 15 th July 22

Intensity 0 No odour 1 Very faint odour 2 Faint odour	3 Distinct odour 4 Strong odour 5 Very strong odour 6 Extremely strong odour	Receptor sensitivity Low (footpath, road) Medium (industrial or commercial workplaces) High (housing pub/hotel etc)
