Additional methodology to allow for void repairs to be undertaken within the sea wall, with an open cavity to the sea also being patched at the earliest opportunity. The project team has been in contact regarding the void with the license team. The current license has been recently modified to allow for more time to implement repairs and search for other similar voids, however ideally the known repairs should be undertaken before winter 2023/2024 to avoid additional defence degradation. Please find attached amended HRA and supporting task documents.
