ED3816 Pollution Prevention Plan

- (1). The works will be carried out in strict accordance with GPP5 ('Works and maintenance in or near water' Version 1.2 February 2018'), particularly:**
- (2). No refuelling or lubricating machinery in the river or on the riverbank or beach.**
- (3). Refuelling or lubricating of machinery is to take place at the site compound using drip trays.**
- (4). Any fuel or lubricants stored on site are to be kept at the site compound in locked and bunded storage containers with a volume capacity greater than its contents.**
- (5). Suitable spill kits must be available on site and replaced immediately after use.**
- (6). All machinery is to be in good working condition, with hydraulic hoses checked prior to work commencing.**
- (7). Biodegradable oils are to be used where possible.**
- (8). Pollution incidents must be reported to Natural Resources Wales on 0300 065 3000 without undue delay.**
- (9). All machinery is to be clean on entering site to prevent the spread of Invasive and Non-Native Species (INNS).**
- (10). Machinery access is to be restricted strictly to the area of works and access routes to those areas.**
- (11). The works are to be carried out at times of relatively low water only; river levels, tides, and weather forecasts will be monitored prior to and during the works.**
- (12). All plant or wheel washing must be done away from any surface waters or gullies.**
