Subject: Bangor Beach Road Pumping Station

Dear Sol,

Thank you for the information regarding the proposed Beach Road Pumping Station in Bangor.

We note that the works comprise the drilling of a cable Percussive Borehole, 150mm diameter, 10 metres deep.

On the understanding that the following takes place, the MCA would have no significant concerns to raise with regards to the safety of navigation and would be satisfied that the risk is relatively low on this occasion:

1. All maritime safety legislation is complied with;
2. Local notification is issued to marine users, including fishermen's organisations, relevant authorities and other local stakeholders, to ensure that they are made fully aware of the activity at least five days before commencement of the works;
3. Zone31@hmcg.gov.uk must be notified prior to commencement of activities.
4. A notification must be sent to The Source Data Receipt team, UK Hydrographic Office (email: sdr@ukho.gov.uk) of commencement of the licensed activities, at least 10 days before commencement of the works. The information supplied must include the start date and end date, a description of the works, positions of the work area (WGS84), and details of any marking arrangements.
5. If using machinery land side in the intertidal area at low tide, ensure suitable bunding and/or storage facilities are installed to contain and prevent the release of fuel, oils, and chemicals associated with plant, refuelling and equipment, into the marine environment.

Please can you confirm that you accept the above risk mitigations?

Kind regards,

Jo Cooke

Dear Sir/Madam:

Eric Wright Water Limited are planning to drill a cable Percussive Borehole on behalf of Welsh Water adjacent to their Beach Road Bangor sewage pumping station. The borehole is a 150mm hole 10 meter deep. Location of the borehole is shown below.
