### Section 1 – Compliance Assessment Summary

This is based on the requirements of the permit under the Environmental Permitting Regulations or the licence under the Water Resources Act 1991 as amended by the Water Act 2003. A detailed explanation is captured in "Compliance Assessment Report Detail" (Section 2) and any actions you may need to take are given in the "Action(s)" (section 4). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

**Form L1, Compliance with Low Impact Installation Criteria 2018**, was received on 14<sup>th</sup> January 2019.

The installation continues to comply with the low impact criteria.

It is interesting to note that even though production has increased by more than 25% compared with 2017, the use of water has reduced slightly. Electricity use has increased slightly and waste generation has also increased compared with 2017. Alembic should give consideration to ways of reducing waste generation.

The report is accepted.
