Dear Team,

Re: Application for a Bespoke Permit.

Please find enclosed an application for a Bespoke Permit to discharge treated sewage effluent to a watercourse.

A site plan and additional supporting information is attached to the back of the enclosed Application.

The reed-bed system will be constructed in accordance with the guidelines being negotiated with the Environment Agency by the Constructed Wetland Association. These Guidelines are designed to provide a standard for reed-beds that will make them a viable alternative to a package sewage plant under the terms of the General Binding Rules for Small Sewage Discharges that came into effect in England from January 2015.

Is it possible that because the discharge from Eastmoor Farm will be less than 2 m³/day that the Farm and Mr Archer will be exempt from requiring to apply for an Environmental Permit?

I look forward to hearing from you.

Yours sincerely

Dr Rick Hudson
Managing Director
