8.3 Do you wish your abstracted quantities to be aggregated?

You can aggregate:

- i) across some or all of the abstraction points, or reaches, or areas listed above.
- ii) with other abstractions you wish to have licensed through the transitional process.
- iii) abstractions you need to have licensed through the standard licensing process.
- iv) with existing licences you hold.

No ☒

Yes ☐ Provide details of any proposed aggregation in the box below. If necessary, continue on a separate sheet and provide a reference for this document.

Document reference

8.4 Please provide a detailed description of how the abstraction(s) has/have taken place

Use the box below to tell us about your abstraction(s). The description should include the following:

- A diagram or schematic of how the activity has been undertaken, using your abstraction point references and including any discharge points
- Details of the structure and equipment involved in the abstraction. This should include dimensions.
- Details of your means of measurement or assessment of abstraction quantities method

If necessary, continue on a separate sheet and tell us the reference for this document.

Document reference

Water is pumped from the quarry sump to point "D" as shown on discharge consent BN0205001

The pump is on a float switch to maintain the water surface elevation in the sump.

The volume pumped is recorded by a meter that is read manually.

The water also flows through a flume with a thin-plate weir and a water depth recorder

8.5 Please list the evidence you are providing to support your application

Use the box below. The evidence should demonstrate the following:

- That abstraction has taken place at some time during the seven year qualifying period.
- The quantities of water you have abstracted during the qualifying period. For example, records of meter readings, or cropping plans.

If necessary, continue on a separate sheet and provide a reference for this document.

Document reference

As noted above, each pump has a meter that is read at intervals of up to 28 days and from the readings the daily totals are computed and summed to obtain monthly totals.

Since November 2016 the water has been discharged via a flume with a water depth recorder giving hourly flows.

An annual report is prepared for the MPA

9. Discharge details

9.1 Please provide details on any discharge of abstracted water in table 9.1 below and on the map used to show abstraction locations.

If necessary, continue a separate sheet and provide a reference for this document.

9.2 Please provide a description of discharge structures and equipment

Discharge is via a pipe to the flume (228584 209183) from which water drains under gravity via a further pipe to the Pill

If necessary, continue a separate sheet and provide a reference for this document.
