30 January 2023

Dear Simon,

**Proposed shredder, Celsa, Rover Way, Cardiff**

**Addendum to Preliminary Ecological Appraisal**

Further to the issue of the Preliminary Ecological Appraisal for the proposed Celsa shredder, Rover Way, Cardiff, the red line site boundary has been changed slightly in the north-east of the survey area to accommodate possible future development by Cardiff Council (drawing ref 21.121/C03 rev G) .

The additional land beside the Haith Building that is now included within the red line boundary was checked during my ecology site inspection during April 2022, and I did not record any species or habitats of ecological significance in it.

The surfaces and structures were limited to hard-standing, stone chippings and piles of shredded metal waste, with sparse ruderal plants. The ecological character of this additional land is very similar to the rest of the works area, with negligible value for nature conservation, and it would therefore be covered by the same general assessment and recommendations. As such, and because it is still less than a year after my last site visit, I do not consider it requires any further survey.

Yours sincerely,

Peter Sturgess
