Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

This variation amends the installation boundary to include a parcel of land on which sludge cakes are stored. The sludge cakes are stored in dedicated storage bays. It also removes Condition 4.2.5 which required the Operator to provide an annual Solvent Emission Plan, as this requirement is not relevant to this permit, and also adds four new wastes codes to the list of wastes the site is permitted to accept.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
