

Permit with introductory note

The Environmental Permitting (England & Wales) Regulations 2016

Volac International Limited

**Volac Felinfach
The Old Creamery
Felinfach
Lampeter
Ceredigion
SA48 8AG**

Permit number

EPR/BV4177IS

Volac Felinfach

Permit number EPR/BV4177IS

Introductory note

This introductory note does not form a part of the permit

The main features of the permit are as follows.

The installation produces about 55,000 t/yr of animal feed and human food ingredients from whey, a by-product of cheese production. Incoming whey is pasteurised, then the components are separated and concentrated using membrane technology prior to evaporation in a multi-effect evaporator. Recovered materials are crystallised and/or dried to produce solids which, in the case of animal feeds are blended with other purchased ingredients to generate finished products.

Associated activities, as detailed in Table S1.1 include the storage of raw materials and partly processed products in stainless steel silos, product packaging, refrigeration plant, storage, handling of LNG and heat and steam generation and a 20MWth Biomass Combined Heat and Power (CHP) Plant which uses virgin wood.

There are twenty eight emission points to air as detailed in Table S3.1, including the emissions points from the MCP Standard Rules SR2018 No 7. All process effluents are routed to a common sump and thence to an off site effluent treatment plant outside the installation boundary, with final consented discharge of the treated effluent into Cardigan Bay. Uncontaminated surface water discharges to land and via a new emission point W2, to an unnamed watercourse as detailed in Table 3.2.

Packaging waste is segregated into recyclable and landfill, and is stored in separate skips pending collection by licensed contractors. Hazardous waste (waste oil) is stored in a bunded tank prior to off site recovery.

The nearest human receptors are within 50m of the installation boundary. There are three European sites within 10 km of which the nearest is Afon Teifi/River Teifi SAC. The site participates in a Climate Change Agreement.

Techniques include both the technology used and the way in which the installation is designed, built, maintained, operated and decommissioned.

In some sections of the Permit conditions require the Operator to use Best Available Techniques (BAT), in each of the aspects of the management of the Permitted Installation, to prevent and where that is not practicable to reduce emissions.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.

Status log of the permit

Permit

The Environmental Permitting (England and Wales) Regulations 2016

Permit number

EPR/ BV4177IS

The Natural Resources Body for Wales (“Natural Resources Wales”) authorises, under regulation 20 of the Environmental Permitting (England and Wales) Regulations 2016

Volac International Limited (“the operator”)

whose registered office

50 Fishers Lane

Orwell

Royston

Hertfordshire

SG8 5QX

company registration number **02576295**

to operate a regulated facility at

Volac Felinfach

The Old Creamery

Felinfach

Lampeter

Ceredigion

SA48 8AG

to the extent authorised by and subject to the conditions of this permit.

Under regulation 27(2) of the Regulations, standard rules SR2018 No7 are conditions of this permit.

|--------------------|-------------------|
| Holly Noble | 15/07/2020 |
|--------------------|-------------------|

Authorised on behalf of Natural Resources Wales

Conditions

1 Management

1.1 General management

- 1.1.1 The operator shall manage and operate the activities:
- (a) in accordance with a written management system that identifies and minimises risks of pollution, including those arising from operations, maintenance, accidents, incidents, non-conformances, closure and those drawn to the attention of the operator as a result of complaints; and
 - (b) using sufficient competent persons and resources.
- 1.1.2 Records demonstrating compliance with condition 1.1.1 shall be maintained.
- 1.1.3 Any person having duties that are or may be affected by the matters set out in this permit shall have convenient access to a copy of it kept at or near the place where those duties are carried out.

1.2 Energy efficiency

- 1.2.1 The operator shall:
- (a) take appropriate measures to ensure that energy is used efficiently in the activities;
 - (b) review and record at least every four years whether there are suitable opportunities to improve the energy efficiency of the activities; and
 - (c) take any further appropriate measures identified by a review.

1.3 Efficient use of raw materials

- 1.3.1 The operator shall:
- (a) take appropriate measures to ensure that raw materials and water are used efficiently in the activities;
 - (b) maintain records of raw materials and water used in the activities;
 - (c) review and record at least every four years whether there are suitable alternative materials that could reduce environmental impact or opportunities to improve the efficiency of raw material and water use; and
 - (d) take any further appropriate measures identified by a review.

1.4 Avoidance, recovery and disposal of wastes produced by the activities

- 1.4.1 The operator shall take appropriate measures to ensure that:
- (a) the waste hierarchy referred to in Article 4 of the Waste Framework Directive is applied to the generation of waste by the activities; and
 - (b) any waste generated by the activities is treated in accordance with the waste hierarchy referred to in Article 4 of the Waste Framework Directive; and
 - (c) where disposal is necessary, this is undertaken in a manner which minimises its impact on the environment.
- 1.4.2 The operator shall review and record at least every four years whether changes to those measures should be made and take any further appropriate measures identified by a review.

2 Operations

2.1 Permitted activities

- 2.1.1 The operator is only authorised to carry out the activities specified in schedule 1 table S1.1 (the “activities”).

2.2 The site

- 2.2.1 The activities shall not extend beyond the site, being the land shown edged in green on the site plan at schedule 7 to this permit.

2.3 Operating techniques

- 2.3.1 (a) The activities shall, subject to the conditions of this permit, be operated using the techniques and in the manner described in the documentation specified in schedule 1, table S1.2, unless otherwise agreed in writing by Natural Resources Wales.
- (b) If notified by Natural Resources Wales that the activities are giving rise to pollution, the operator shall submit to Natural Resources Wales for approval within the period specified, a revision of any plan or other documentation (“plan”) specified in schedule 1, table S1.2 or otherwise required under this permit which identifies and minimises the risks of pollution relevant to that plan, and shall implement the approved revised plan in place of the original from the date of approval, unless otherwise agreed in writing by Natural Resources Wales.
- 2.3.2 Any raw materials or fuels listed in schedule 2 table S2.1 shall conform to the specifications set out in that table.
- 2.3.3 The operator shall ensure that where waste produced by the activities is sent to a relevant waste operation, that operation is provided with the following information, prior to the receipt of the waste:
- (a) the nature of the process producing the waste;
 - (b) the composition of the waste;
 - (c) the handling requirements of the waste;
 - (d) the hazardous property associated with the waste, if applicable; and
 - (e) the waste code of the waste.
- 2.3.4 The operator shall ensure that where waste produced by the activities is sent to a landfill site, it meets the waste acceptance criteria for that landfill.

2.4 Improvement programme

- 2.4.1 The operator shall complete the improvements specified in schedule 1 table S1.3 by the date specified in that table unless otherwise agreed in writing by Natural Resources Wales.

2.5 Pre-operational conditions

- 2.5.1 The activities shall not be brought into operation until the measures specified in schedule 1 table S1.4 have been completed.

3 Emissions and monitoring

3.1 Emissions to water, air or land

- 3.1.1 There shall be no point source emissions to water, air or land except from the sources and emission points listed in schedule 3 tables S3.1, S3.2 and S3.3.

- 3.1.2 The limits given in schedule 3 shall not be exceeded.
- 3.1.3 Periodic monitoring shall be carried out at least once every 5 years for groundwater and 10 years for soil, unless such monitoring is based on a systematic appraisal of the risk of contamination.

3.2 Emissions of substances not controlled by emission limits

- 3.2.1 Emissions of substances not controlled by emission limits (excluding odour) shall not cause pollution. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved emissions management plan, have been taken to prevent or where that is not practicable, to minimise, those emissions.
- 3.2.2 The operator shall:
- (a) if notified by Natural Resources Wales that the activities are giving rise to pollution, submit to Natural Resources Wales for approval within the period specified, an emissions management plan which identifies and minimises the risks of pollution from emissions of substances not controlled by emission limits;
 - (b) implement the approved emissions management plan, from the date of approval, unless otherwise agreed in writing by Natural Resources Wales.
- 3.2.3 All liquids in containers, whose emission to water or land could cause pollution, shall be provided with secondary containment, unless the operator has used other appropriate measures to prevent or where that is not practicable, to minimise, leakage and spillage from the primary container.

3.3 Odour

- 3.4.1 Emissions from the activities shall be free from odour at levels likely to cause pollution outside the site, as perceived by an authorised officer of Natural Resources Wales, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved odour management plan, to prevent or where that is not practicable to minimise the odour.
- 3.4.2 The operator shall:
- (a) if notified by Natural Resources Wales that the activities are giving rise to pollution outside the site due to odour, submit to Natural Resources Wales for approval within the period specified, an odour management plan which identifies and minimises the risks of pollution from odour;
 - (b) implement the approved odour management plan, from the date of approval, unless otherwise agreed in writing by Natural Resources Wales.

3.4 Noise and vibration

- 3.5.1 Emissions from the activities shall be free from noise and vibration at levels likely to cause pollution outside the site, as perceived by an authorised officer of Natural Resources Wales, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved noise and vibration management plan to prevent or where that is not practicable to minimise the noise and vibration.
- 3.5.2 The operator shall:
- (a) if notified by Natural Resources Wales that the activities are giving rise to pollution outside the site due to noise and vibration, submit to Natural Resources Wales for approval within the period specified, a noise and vibration management plan which identifies and minimises the risks of pollution from noise and vibration;
 - (b) implement the approved noise and vibration management plan, from the date of approval, unless otherwise agreed in writing by Natural Resources Wales.

3.5 Monitoring

- 3.3.1 The operator shall, unless otherwise agreed in writing by Natural Resources Wales, undertake the monitoring specified in the following tables in schedule 3 to this permit:
- (a) point source emissions specified in tables S3.1, S3.2 and S3.3;
- 3.3.2 The operator shall maintain records of all monitoring required by this permit including records of the taking and analysis of samples, instrument measurements (periodic and continual), calibrations, examinations, tests and surveys and any assessment or evaluation made on the basis of such data.
- 3.3.3 Monitoring equipment, techniques, personnel and organisations employed for the emissions monitoring programme and the environmental or other monitoring specified in condition 3.3.1 shall have either MCERTS certification or MCERTS accreditation (as appropriate), where available, unless otherwise agreed in writing by Natural Resources Wales.
- 3.3.4 Permanent means of access shall be provided to enable sampling/monitoring to be carried out in relation to the emission points specified in schedule 3 tables S3.1, S3.2, S3.3 unless otherwise agreed in writing by Natural Resources Wales.

3.6 Pests

- 3.6.1 The activities shall not give rise to the presence of pests which are likely to cause pollution, hazard or annoyance outside the boundary of the site. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved pests management plan, have been taken to prevent or where that is not practicable, to minimise the presence of pests on the site.
- 3.6.2 The operator shall:
- (a) if notified by Natural Resources Wales, submit to Natural Resources Wales for approval within the period specified, a pests management plan which identifies and minimises risks of pollution, hazard or annoyance from pests;
 - (b) implement the pests management plan, from the date of approval, unless otherwise agreed in writing by Natural resources Wales

4 Information

4.1 Records

- 4.1.1 All records required to be made by this permit shall:
- (a) be legible;
 - (b) be made as soon as reasonably practicable;
 - (c) if amended, be amended in such a way that the original and any subsequent amendments remain legible, or are capable of retrieval; and
 - (d) be retained, unless otherwise agreed in writing by Natural Resources Wales, for at least 6 years from the date when the records were made, or in the case of the following records until permit surrender:
 - (i) off-site environmental effects; and
 - (ii) matters which affect the condition of the land and groundwater.
- 4.1.2 The operator shall keep on site all records, plans and the management system required to be maintained by this permit, unless otherwise agreed in writing by Natural Resources Wales.

4.2 Reporting

- 4.2.1 The operator shall send all reports and notifications required by the permit to Natural Resources Wales using the contact details supplied in writing by Natural Resources Wales.
- 4.2.2 Within 28 days of the end of the reporting period the operator shall, unless otherwise agreed in writing by Natural Resources Wales, submit reports of the monitoring and assessment carried out in accordance with the conditions of this permit, as follows:
- (a) in respect of the parameters and emission points specified in schedule 4 table S4.1;
 - (b) for the reporting periods specified in schedule 4 table S4.1 and using the forms specified in schedule 4 table S4.4 ; and
 - (c) giving the information from such results and assessments as may be required by the forms specified in those tables.
- 4.2.3 A report or reports on the performance of the activities over the previous year shall be submitted to Natural Resources Wales by 31 January (or other date agreed in writing by Natural Resources Wales) each year. The report(s) shall include as a minimum:
- (a) a review of the results of the monitoring and assessment carried out in accordance with the permit including an interpretive review of that data;
 - (b) the annual production/treatment data set out in schedule 4 table S4.2; and
 - (c) the performance parameters set out in schedule 4 table S4.3 using the forms specified in table S4.4 of that schedule.
- 4.2.4 The operator shall, unless notice under this condition has been served within the preceding four years, submit to Natural Resources Wales, within six months of receipt of a written notice, a report assessing whether there are other appropriate measures that could be taken to prevent, or where that is not practicable, to minimise pollution.

4.3 Notifications

- 4.3.1 (a) In the event that the operation of the activities gives rise to an incident or accident which significantly affects or may significantly affect the environment, the operator must immediately—
- (i) inform Natural Resources Wales,
 - (ii) take the measures necessary to limit the environmental consequences of such an incident or accident, and
 - (iii) take the measures necessary to prevent further possible incidents or accidents;
- (b) in the event of a breach of any permit condition the operator must immediately—
- (i) inform Natural Resources Wales, and
 - (ii) take the measures necessary to ensure that compliance is restored within the shortest possible time;
- (c) in the event of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment, the operator must immediately suspend the operation of the activities or the relevant part of it until compliance with the permit conditions has been restored.
- 4.3.2 Any information provided under condition 4.3.1 [(a)(i), or 4.3.1 (b)(i) where the information relates to the breach of a limit specified in the permit,] shall be confirmed by sending the information listed in schedule 5 to this permit within the time period specified in that schedule.

- 4.3.3 Where Natural Resources Wales has requested in writing that it shall be notified when the operator is to undertake monitoring and/or spot sampling, the operator shall inform Natural Resources Wales when the relevant monitoring and/or spot sampling is to take place. The operator shall provide this information to Natural Resources Wales at least 14 days before the date the monitoring is to be undertaken.
- 4.3.4 Natural Resources Wales shall be notified within 14 days of the occurrence of the following matters, except where such disclosure is prohibited by Stock Exchange rules:

Where the operator is a registered company:

- (a) any change in the operator's trading name, registered name or registered office address; and
- (b) any steps taken with a view to the operator going into administration, entering into a company voluntary arrangement or being wound up.

Where the operator is a corporate body other than a registered company:

- (a) any change in the operator's name or address; and
- (b) any steps taken with a view to the dissolution of the operator.

In any other case:

- (a) the death of any of the named operators (where the operator consists of more than one named individual);
- (b) any change in the operator's name(s) or address(es); and
- (c) any steps taken with a view to the operator, or any one of them, going into bankruptcy, entering into a composition or arrangement with creditors, or, in the case of them being in a partnership, dissolving the partnership.

- 4.3.5 Where the operator proposes to make a change in the nature or functioning, or an extension of the activities, which may have consequences for the environment and the change is not otherwise the subject of an application for approval under the Regulations or this permit:
- (a) Natural Resources Wales shall be notified at least 14 days before making the change; and
 - (b) the notification shall contain a description of the proposed change in operation.
- 4.3.6 Natural Resources Wales shall be given at least 14 days notice before implementation of any part of the site closure plan.
- 4.3.7 Where the operator has entered into a climate change agreement with the Government, Natural Resources Wales shall be notified within one month of:
- (a) a decision by the Secretary of State not to re-certify the agreement;
 - (b) a decision by either the operator or the Secretary of State to terminate the agreement; and
 - (c) any subsequent decision by the Secretary of State to re-certify such an agreement.

4.3 Notifications

- 4.3.1 Where Natural Resources Wales has requested in writing that it shall be notified when the operator is to undertake monitoring and/or spot sampling, the operator shall inform Natural Resources Wales when the relevant monitoring and/or spot sampling is to take place. The operator shall provide this information to Natural Resources Wales at least 14 days before the date the monitoring is to be undertaken.
- 4.3.2 Natural Resources Wales shall be notified within 14 days of the occurrence of the following matters, except where such disclosure is prohibited by Stock Exchange rules:

Where the operator is a registered company:

- (b) any change in the operator's trading name, registered name or registered office address; and
- (b) any steps taken with a view to the operator going into administration, entering into a company voluntary arrangement or being wound up.

Where the operator is a corporate body other than a registered company:

- (c) any change in the operator's name or address; and
- (d) any steps taken with a view to the dissolution of the operator.

4.3.3 (a) In the event that the operation of the activities gives rise to an incident or accident which significantly affects or may significantly affect the environment, the operator must immediately—

- (i) inform Natural Resources Wales,
- (ii) take the measures necessary to limit the environmental consequences of such an incident or accident, and
- (iii) take the measures necessary to prevent further possible incidents or accidents;

(b) in the event of a breach of any permit condition the operator must immediately—

- (i) inform Natural Resources Wales, and
- (ii) take the measures necessary to ensure that compliance is restored within the shortest possible time;

(c) in the event of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment, the operator must immediately suspend the operation of the activities or the relevant part of it until compliance with the permit conditions has been restored.

4.3.4 Any information provided under condition 4.3.3 [(a)(i), or 4.3.1 (b)(i) where the information relates to the breach of a limit specified in the permit,] shall be confirmed by sending the information listed in schedule 5 to this permit within the time period specified in that schedule.

4.3.5 In any other case:

- (d) the death of any of the named operators (where the operator consists of more than one named individual);
- (e) any change in the operator's name(s) or address(es); and
- (f) any steps taken with a view to the operator, or any one of them, going into bankruptcy, entering into a composition or arrangement with creditors, or, in the case of them being in a partnership, dissolving the partnership.

4.3.6 Where the operator proposes to make a change in the nature or functioning, or an extension of the activities, which may have consequences for the environment and the change is not otherwise the subject of an application for approval under the Regulations or this permit:

- (c) Natural Resources Wales shall be notified at least 14 days before making the change; and
- (d) the notification shall contain a description of the proposed change in operation.

4.3.7 Natural Resources Wales shall be given at least 14 days notice before implementation of any part of the site closure plan.

4.3.8 Where the operator has entered into a climate change agreement with the Government, Natural Resources Wales shall be notified within one month of:

- (a) a decision by the Secretary of State not to re-certify the agreement;
- (b) a decision by either the operator or the Secretary of State to terminate the agreement; and

- (c) any subsequent decision by the Secretary of State to re-certify such an agreement.

4.4 Interpretation

- 4.4.1 In this permit the expressions listed in schedule 6 shall have the meaning given in that schedule.
- 4.4.2 In this permit references to reports and notifications mean written reports and notifications, except where reference is made to notification being made "immediately", in which case it may be provided by telephone.

Schedule 1 - Operations

Table S1.1 activities

| Activity reference | Activity listed in Schedule 1 of the EP Regulations | Description of specified activity | Limits of specified activity |
|-------------------------------------|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| AR1 | Section 6.8 Part A(1)(d)(i): Production of food products from animal raw materials. | Products as defined in Section B1.4.1 of the Application. Raw materials used as specified in Section B2.4 of the Application. | From receipt and storage of raw materials to despatch of finished product from the installation. |
| AR13 | Section 1.1 Part B(a)(ii) | The combustion of wood in a combined heat and power (CHP) plant. | 20 MWth thermal input plant generating electricity and heat. Non waste wood only. |
| Directly Associated Activity | | | |
| AR2 | Directly Associated Activity. | Raw material storage | From receipt of raw materials to input to process. Excludes the storage of heavy fuel oil. |
| AR3 | Directly Associated Activity. | Intermediate storage of partly processed materials. | From receipt of materials to return to process. |
| AR4 | Directly Associated Activity | Intermediate storage of recovered nitric acid | From receipt of recovered nitric acid to return to process or disposal to sewer. |
| AR5 | Directly Associated Activity. | Storage and handling of kerosene. | From receipt of kerosene to despatch to boilers. For use as standby fuel for LNG systems. |
| AR6 | Directly Associated Activity. | Storage and handling of solid and liquid wastes. | Production of waste to despatch from the Permitted Installation. |
| AR7 | Directly Associated Activity. | Finished products storage and packaging. | From receipt of finished goods to despatch from the Permitted Installation. |
| AR8 | Directly Associated Activity. | Heat generation plant. | Installed capacity less than 20 MWth thermal input. |
| AR9 | Directly Associated Activity | Steam generation. | Two steam-raising boilers (9.622 MW and 9.025 MW output) to supply steam to the product processing areas. Powered by LNG/kerosene. |

| | | | |
|------|-------------------------------|------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| AR10 | Directly Associated Activity | Storage and handling of Liquefied Natural Gas. | From receipt of Liquefied Natural Gas to delivery to boilers, including tanker reception facilities, storage tanks, a re-gasification process and site gas distribution pipework. Storage limited to 49 tonnes at any one time. |
| AR11 | Directly Associated Activity. | Ammonia refrigeration plant. | The whole refrigeration system including storage and handling of ammonia. |
| AR12 | Directly Associated Activity | Storage of wood. | Storage prior to being used as fuel in CHP plant. Non waste wood only. |
| AR14 | Directly Associated Activity | Chipping of wood. | Chipping of wood in a building prior to be used as fuel for the CHP plant. Non waste wood only. |
| AR15 | Directly Associated Activity | Storage of bottom ash and fly ash. | Production of waste to despatch from the Permitted Installation. |
| AR16 | Directly Associated Activity | Water heating circuit. | 10 MW thermal output steam boiler providing heat and hot water |
| AR17 | Directly Associated Activity | Storage of gas oil. | From receipt of gas oil to use in water heating circuit. |
| AR18 | Directly Associated Activity | Drying of wood | Using waste heat to dry wood prior to being used as fuel in CHP plant. Non waste wood only. |

Table S1.2 Operating techniques

| Description | Parts | Date Received |
|----------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|
| Application | The response to questions 2.1 and 2.2 given in pages 10-38 of the application. | 22/07/04 |
| Variation Application | The response to questions 1.2, 2.1 to 2.12 (inclusive), 3.1 and 4.1 to 4.3 (inclusive) in part c of the Application Form. | 20/12/06 |
| Variation Application | The response to questions 1.2, 2.1 to 2.12 (inclusive), 3.1 and 4.1 to 4.3 (inclusive) in part C of the Application Form, and further information. | 29/10/07, 07/12/07, 22/01/08, 25/01/08 |
| Variation Application | The response to question 2b in Part C2 of the Application Form, questions 3a, 4a, 6a, 6b, 6d and 6e in part C3 of the Application Form. | 03/01/12 |
| Response to Schedule 5 Notice dated 30/01/12 | The response to questions 1 and 2 | 07/02/12 |

Table S1.2 Operating techniques

| Description | Parts | Date Received |
|-----------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|-----------------------|
| Response to Schedule 5 Notice dated 07/02/12. | The response to question 1. | 07/02/12 |
| JER5909 received with variation application | Section 2 (detailed Project Description), Section 3 (Operations) and Section 4 (Management). | 14/09/15 |
| Fire Prevention Plan | All. | On completion of IP17 |
| Email from applicant | 2 - emission points and fuel use | 29/02/16 |
| Email from operator | Confirmation of thermal capacities of all combustion plant on site. | 08/03/16 |
| Stacks – additional detail | All. | 09/03/16 |
| Drainage Plans drawings P2013-03 09 and P2013-33 011 | All. | 09/03/16 |
| Email from applicant | All – information relating to drainage arrangements | 11/03/16 |
| Variation application EPR/BV4177IS/V008 | Documents referenced in part 3 of application form C3 | 16/09/16 |
| Variation application EPR/BV4177IS/V008, Supplementary supporting documents | Description of Changes to Existing Activities; Part C3 – (3) Operating Techniques & Monitoring | 7/11/16 |
| Variation application EPR/BV4177IS/V008, Supplementary supporting document | Drawing entitled “Discharge points” referenced IPPC_01_03 dated 01-02-17. | 2/02/17 |
| Variation application EPR/BV4177IS/V009 | All documents submitted as part of the variation | 06/02/20 |
| Variation application EPR/BV4177IS/V009, Supplementary supporting document | Additional information provided in response for further information. | 11/05/20 |

Table S1.3 Improvement programme requirements

| Reference | Requirement | Date |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| IP1-IP8 | Improvement conditions required by EPR/BV4177IS issued 27/06/05. | Completed |
| IP9 | Improvement condition required by EPR/BV4177IS/PP3481MY issued 31/08/07. | Completed |
| IP10-IP12 | Improvement conditions required by EPR/BV4177IS/V004 issued 21/03/12. | Completed |
| IP13 | The Operator shall provide a written report to Natural Resources Wales detailing proposals to ensure protection of land at the installation (and adjacent controlled waters) in the event of any failure of primary containment of silos AL and AM. The report shall contain a timetable for any proposed works deemed necessary to secure BAT. | Completed |
| IP14-IP15 | Improvement conditions required by EPR/BV4177IS/V004 issued 21/03/12. | Completed |
| IP16 | The Operator shall submit a written report to Natural Resources Wales on the commissioning of the combined heat and power (CHP) biomass plant. The report shall summarise the environmental performance of the plant as installed against the design parameters set out in the Application. The report shall also include a review of the performance of the facility against the conditions of this permit and details of procedures developed during commissioning for achieving and demonstrating compliance with permit conditions. | Report Under Assessment |

Table S1.3 Improvement programme requirements

| Reference | Requirement | Date |
|-----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| IP1-IP8 | Improvement conditions required by EPR/BV4177IS issued 27/06/05. | Completed |
| IP9 | Improvement condition required by EPR/BV4177IS/PP3481MY issued 31/08/07. | Completed |
| IP10-IP12 | Improvement conditions required by EPR/BV4177IS/V004 issued 21/03/12. | Completed |
| IP17 | The Operator shall submit the final version of the Fire Prevention Plan provided as a draft on 08/02/16, to Natural Resources Wales for approval. | Plan Under Assessment |
| IP18 | The operator shall undertake quantitative monitoring of particulates from emission point A1. This monitoring shall be carried out quarterly for one year and the results supplied to NRW. The sampling and analysis shall be carried out to the standards specified in BS EN 13284-1. The results of the analysis shall be forwarded to Natural Resources Wales. | Completed |

Table S1.4 Pre-operational measures

| Reference | Requirement | Date |
|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|
| 1 | Pre operational measure required by EPR/BV4177IS/V004 issued 21/03/12. | Completed |
| PO1 | Prior to the commencement of commissioning of the combined heat and power (CHP) biomass plant the operator shall provide a written commissioning plan, including timescales for completion, for approval by Natural Resources Wales. The commissioning plan shall include the expected emissions to the environment during the different stages of commissioning, the expected durations of commissioning activities and the actions to be taken to protect the environment and report to Natural Resources Wales in the event that actual emissions exceed expected emissions. Commissioning shall be carried out in accordance with the commissioning plan as approved. | Under Assessment |
| PO2 | Prior to commencing operations at the CHP plant the Operator shall submit to Natural Resources Wales for approval a protocol for the sampling and testing of fly ash and bottom ash for the purposes of assessing its hazard status. Sampling and testing shall be carried out in accordance with the protocol as approved. | Under Assessment |

| Table S2.1 Raw materials and fuels | |
|------------------------------------|-----------------|
| Raw materials and fuel description | Specification |
| None specified | None specified. |

Schedule 3 – Emissions and monitoring

Table S3.1 Point source emissions to air – emission limits and monitoring requirements

| Emission point ref. & location | Source | Parameter | Limit (including unit) | Reference period | Monitoring frequency | Monitoring standard or method |
|--------------------------------------------------------------------------|----------------------------------------------------------------------------------|-----------|------------------------|------------------|----------------------|-------------------------------|
| Point A1 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Feeds dryer, via bag filter. | None | - | - | - | - |
| Point A3a on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | 2.5MWth thermal input, thermal oil heater powered by LNG serving drying process. | None | - | - | - | - |
| Point A3b on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | 2.5MWth thermal input, thermal oil heater powered by LNG serving drying process. | None | - | - | - | - |
| Point A4 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Food dryer. | None | - | - | - | - |
| Point A6 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | 2 x steam raising boilers (9.622 MW and 9.025 MW output) powered by LNG. | None | No limit set | - | - | - |
| Point A7 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Wet scrubber on nitric acid tank vent (Tank VN). | None | No limit set | - | - | - |
| Point A8 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Dryer. | None. | No limit set | - | - | - |

Table S3.1 Point source emissions to air – emission limits and monitoring requirements

| Emission point ref. & location | Source | Parameter | Limit (including unit) | Reference period | Monitoring frequency | Monitoring standard or method |
|-----------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|------------------------------------|------------------------|------------------|----------------------|-------------------------------|
| Point A9 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Dryer. | None | No limit set | - | - | - |
| Point A10 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Lactose milling, via a bag filter. | None | No limit set | - | - | - |
| Point A11 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Lactose powder handling, via a bag filter | None | No limit set | - | - | - |
| Point A12 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Vent on the wet scrubber installed on tank AK. | None | No limit set | - | - | - |
| Point A13 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Safety valve in the ammonia circuit of the refrigeration plant | None | No limit set | - | - | - |
| Point A14.1 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Pressure relief valves on liquefied natural gas storage tank. | None | No limit set | - | - | - |
| Point A14.2 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Pressure relief valves on liquefied natural gas storage tank. | None | No limit set | - | - | - |
| A15 37m Stack. Point A15 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | 20 MWth Combined heat and power (CHP) Biomass Plant and 10 MWe steam boiler in hot water heating system. | Sulphur Dioxide (SO ₂) | 30 mg.Nm ⁻³ | Periodic | Annual | EN 14791 |

Table S3.1 Point source emissions to air – emission limits and monitoring requirements

| Emission point ref. & location | Source | Parameter | Limit (including unit) | Reference period | Monitoring frequency | Monitoring standard or method |
|----------------------------------------------------------------------------|------------------------------|------------------------------------|-------------------------|------------------|------------------------|-------------------------------|
| | | Nitrogen Oxides (NO _x) | 250 mg.Nm ⁻³ | Periodic | Annual | EN 14792 |
| | | Carbon Monoxide (CO) | 150 mg.Nm ⁻³ | Hourly average | Continuous measurement | EN 14181 ¹ |
| | | Carbon Monoxide (CO) | 150 mg.Nm ⁻³ | Periodic | Annual | EN 15058 |
| | | Total particulate matter (PM) | 10 mg.Nm ⁻³ | Periodic | Quarterly ² | EN 13284-1 |
| Point A16 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Explosion vent on dryer unit | None | No limit set | - | - | - |
| Point A17 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Explosion vent on dryer unit | None | No limit set | - | - | - |
| Point A18 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Wood dryer emission point | None | No limit set | - | - | - |
| Point A19 on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Wood dryer emission point | None | No limit set | - | - | - |
| Point A20 on drawing referenced "IPPC Rev10.4-IPPC-01-03-discharge points" | Dryer | None | No limit set | | | |
| Point A21 on drawing referenced "IPPC Rev10.4-IPPC-01-03-discharge points" | Explosion vent on dryer unit | None | No limit set | | | |

Table S3.1 Point source emissions to air – emission limits and monitoring requirements

| Emission point ref. & location | Source | Parameter | Limit (including unit) | Reference period | Monitoring frequency | Monitoring standard or method |
|------------------------------------------------------------------------------|------------------------------|-----------|------------------------|------------------|----------------------|-------------------------------|
| Point A22 on drawing referenced "IPPC Rev10.4-IPPC-01-03-discharge points" | Explosion vent on dryer unit | None | No limit set | | | |
| Point A23 on drawing referenced "IPPC Rev10.4-IPPC-01-03-discharge points" | Powder silo breathe vent | | | | | |
| Point A24 on drawing referenced "IPPC Rev10.4-IPPC-01-03-discharge points" | Powder silo breathe vent | | | | | |
| Point A25 on drawing referenced "IPPC Rev10.4-IPPC-01-03-discharge points" | Powder silo explosion vent | None | No limit set | | | |
| Point A26 on drawing referenced "IPPC Rev10.4-IPPC-01-03-discharge points" " | Powder silo explosion vent | None | No limit set | | | |

Note 1: CEMs which meet the MCERTS requirements should also follow the principles of EN 14181 (i.e. QAL2/AST and QAL3) but a reduced number of parallel measurements may be acceptable (subject to NRW approval).

Note 2: Monitoring to be undertaken quarterly in the first year of operation of the CHP plant. Subject to agreement with NRW the frequency may be reduced after this time.

Table S3.2 Point Source emissions to water (other than sewer) and land – emission limits and monitoring requirements

| Emission point ref. & location | Source | Parameter | Limit (incl. unit) | Reference Period | Monitoring frequency | Monitoring standard or method |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|------------------|-----------------------------------------------------------|-------------------------|-----------------------------|--------------------------------------|
| L1 Soakaway located on the right of the northern boundary of the site area as shown on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Uncontaminated surface water from area of hard standing around the LNG vaporisers. | None | - | - | - | - |
| L2 Soakaway located to the left of the LNG compound area as shown on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Uncontaminated surface water via oil interceptor from LNG offloading area. | None | - | - | - | - |
| L3 Soakaway located centrally on the northern boundary of the site as shown on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Uncontaminated surface water from car park area. | None | - | - | - | - |
| L4 Soakaway located to the left of the LNG compound area as shown on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Uncontaminated surface water via oil interceptor from car park and road area. | None | - | - | - | - |
| W1 Discharge to unnamed watercourse, tributary of the River Aeron. Discharge point shown on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Uncontaminated surface water from storage areas, roof water, roads and concreted areas of land added in application EPR/BV4177IS/V007. | None | Discharge to be free of any visible solids, oil or grease | Periodic | Monthly | Visual |

Table S3.2 Point Source emissions to water (other than sewer) and land – emission limits and monitoring requirements

| Emission point ref. & location | Source | Parameter | Limit (incl. unit) | Reference Period | Monitoring frequency | Monitoring standard or method |
|-----------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|-----------|-----------------------------------------------------------|------------------|----------------------|-------------------------------|
| W2 Surface water discharge from Aeron Development, Discharge point shown on drawing entitled "IPPC Rev10.4-IPPC-01-03-discharge points" | Uncontaminated surface water from storage areas, roof water, roads and concreted areas of land added in application EPR/BV4177IS/V009. | None | Discharge to be free of any visible solids, oil or grease | Periodic | Monthly | Visual |

Table S3.3 Point source emissions to sewer, effluent treatment plant or other transfers off-site– emission limits and monitoring requirements

| Emission point ref. & location | Source | Parameter | Limit (incl. Unit) | Reference period | Monitoring frequency | Monitoring standard or method |
|-----------------------------------------------------------------------------------------------------------------|---------------------------------------------------|-------------------------------|--------------------|------------------|----------------------|-------------------------------------------------------------------------|
| S1 Private sewer to Felinfach Effluent Treatment Plant. Shown on drawing IPPC 01/03 submitted with Application. | The Installation, via the effluent handling plant | Biological Oxygen Demand | 10,000 mg/l | | Monthly | 5 day BOD determined in the presence of allylthiourea. |
| | | Chemical Oxygen demand | 22,162 mg/l | | Monthly | ISO 6060: 1989, Water Quality – Determination of chemical oxygen demand |
| | | Copper | 1.0 mg/l | | Monthly | BS EN ISO 11885:1998, BS 6068-2.60:1998 |
| | | Lead | 1.0 mg/l | | Monthly | BS EN ISO 11885:1998, BS 6068-2.60:1998 |
| | | Nitrogen, total oxidised as N | 50 mg/l | | Monthly | BS EN ISO 13995:1996 |

Table S3.3 Point source emissions to sewer, effluent treatment plant or other transfers off-site– emission limits and monitoring requirements

| Emission point ref. & location | Source | Parameter | Limit (incl. Unit) | Reference period | Monitoring frequency | Monitoring standard or method |
|--------------------------------|--------|------------------|--------------------|------------------|----------------------|--------------------------------------------------------------------------------------------------|
| | | Phosphate as P | No limit set | | Monthly | BS6068: Section 2.28 1997. Determination of phosphorus – ammonium molybdate spectrometric method |
| | | Suspended Solids | 3,324 mg/l | | Monthly | ISO 11929:1997 EN872 Determination of suspended solids. |
| | | Flow | - | Hourly average | Continuous | Volumetric method |

Schedule 4 - Reporting

Parameters, for which reports shall be made, in accordance with conditions of this permit, are listed below.

Table S4.1 Reporting of monitoring data

| Parameter | Emission or monitoring point/reference | Reporting period | Period begins |
|-----------------------------------------------|----------------------------------------|------------------|---------------|
| Biological Oxygen Demand (mg/l) | S1 | Annual | 1 January |
| Chemical Oxygen Demand (mg/l) | S1 | Annual | 1 January |
| Copper (mg/l) | S1 | Annual | 1 January |
| Lead (mg/l) | S1 | Annual | 1 January |
| Nitrogen, Total Oxidised as N (mg/l) | S1 | Annual | 1 January |
| Phosphate as P (mg/l) | S1 | Annual | 1 January |
| Suspended solids (mg/l) | S1 | Annual | 1 January |
| Effluent Flow | S1 | Annual | 1 January |
| Sulphur Dioxide | A15 | Annual | 1 January |
| Nitrogen Oxides | A15 | Annual | 1 January |
| Carbon Monoxide | A15 | Annual | 1 January |
| Total particulate matter | A15 | Annual | 1 January |
| Visual monitoring of discharge to watercourse | W1, W2 | Annual | 1 January |

Table S4.2 Annual production/treatment

| Parameter | Units |
|-------------------------------|--------|
| Production of feeds and foods | Tonnes |

Table S4.3 Performance parameters

| Parameter | Frequency of assessment | Units |
|-----------------------|-------------------------|-----------------------|
| Energy use | Annual | kWh/tonne |
| Potable water use | Annual | m ³ /tonne |
| Non potable water use | Annual | m ³ /tonne |
| Waste disposal | Annual | t/tonne |

Table S4.4 Reporting forms

| Media/parameter | Reporting format | Date of form |
|------------------------------|----------------------------------------------------------------------------------|--------------|
| Sewer | Form sewer 1 or other form as agreed in writing by Natural Resources Wales | 01/04/05 |
| Water usage | Form water usage 1 or other form as agreed in writing by Natural Resources Wales | 01/04/05 |
| Energy usage | Form energy 1 or other form as agreed in writing by Natural Resources Wales | 28/08/07 |
| Air | Form air 1 or other form as agreed in writing by Natural Resources Wales | 17/03/16 |
| Water and Land | Form water 1 or other form as agreed in writing by Natural Resources Wales | 17/03/16 |
| Other performance indicators | Form performance 1 or other form as agreed in writing by Natural Resources Wales | 17/03/16 |

Schedule 5 - Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

Part A

| | |
|--------------------------------|--|
| Permit Number | |
| Name of operator | |
| Location of Facility | |
| Time and date of the detection | |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| (a) Notification requirements for any activity that gives rise to an incident or accident which significantly affects or may significantly affect the environment | |
| To be notified Immediately | |
| Date and time of the event | |
| Reference or description of the location of the event | |
| Description of where any release into the environment took place | |
| Substances(s) potentially released | |
| Best estimate of the quantity or rate of release of substances | |
| Measures taken, or intended to be taken, to stop any emission | |
| Description of the failure or accident. | |

| | |
|---------------------------------------------------------------------------|--|
| (b) Notification requirements for the breach of a permit condition | |
| To be notified immediately | |
| Emission point reference/ source | |
| Parameter(s) | |
| Limit | |
| Measured value and uncertainty | |
| Date and time of monitoring | |
| Measures taken, or intended to be taken, to stop the emission | |

| | |
|---------------------------------------------------------------------------------|----------------------------|
| Time periods for notification following detection of a breach of a limit | |
| Parameter | Notification period |
| | |
| | |

| | |
|--|--|
| | |
|--|--|

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| (c) In the event of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment: | |
| To be notified immediately | |
| Description of where the effect on the environment was detected | |
| Substances(s) detected | |
| Concentrations of substances detected | |
| Date of monitoring/sampling | |

Part B - to be submitted as soon as practicable

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Any more accurate information on the matters for notification under Part A. | |
| Measures taken, or intended to be taken, to prevent a recurrence of the incident | |
| Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission | |
| The dates of any unauthorised emissions from the facility in the preceding 24 months. | |

| | |
|------------------|--|
| Name* | |
| Post | |
| Signature | |
| Date | |

* authorised to sign on behalf of the operator

Schedule 6 - Interpretation

“authorised officer” means any person authorised by Natural Resources Wales under section 108(1) of The Environment Act 1995 to exercise, in accordance with the terms of any such authorisation, any power specified in section 108(4) of that Act.

“biomass” means:

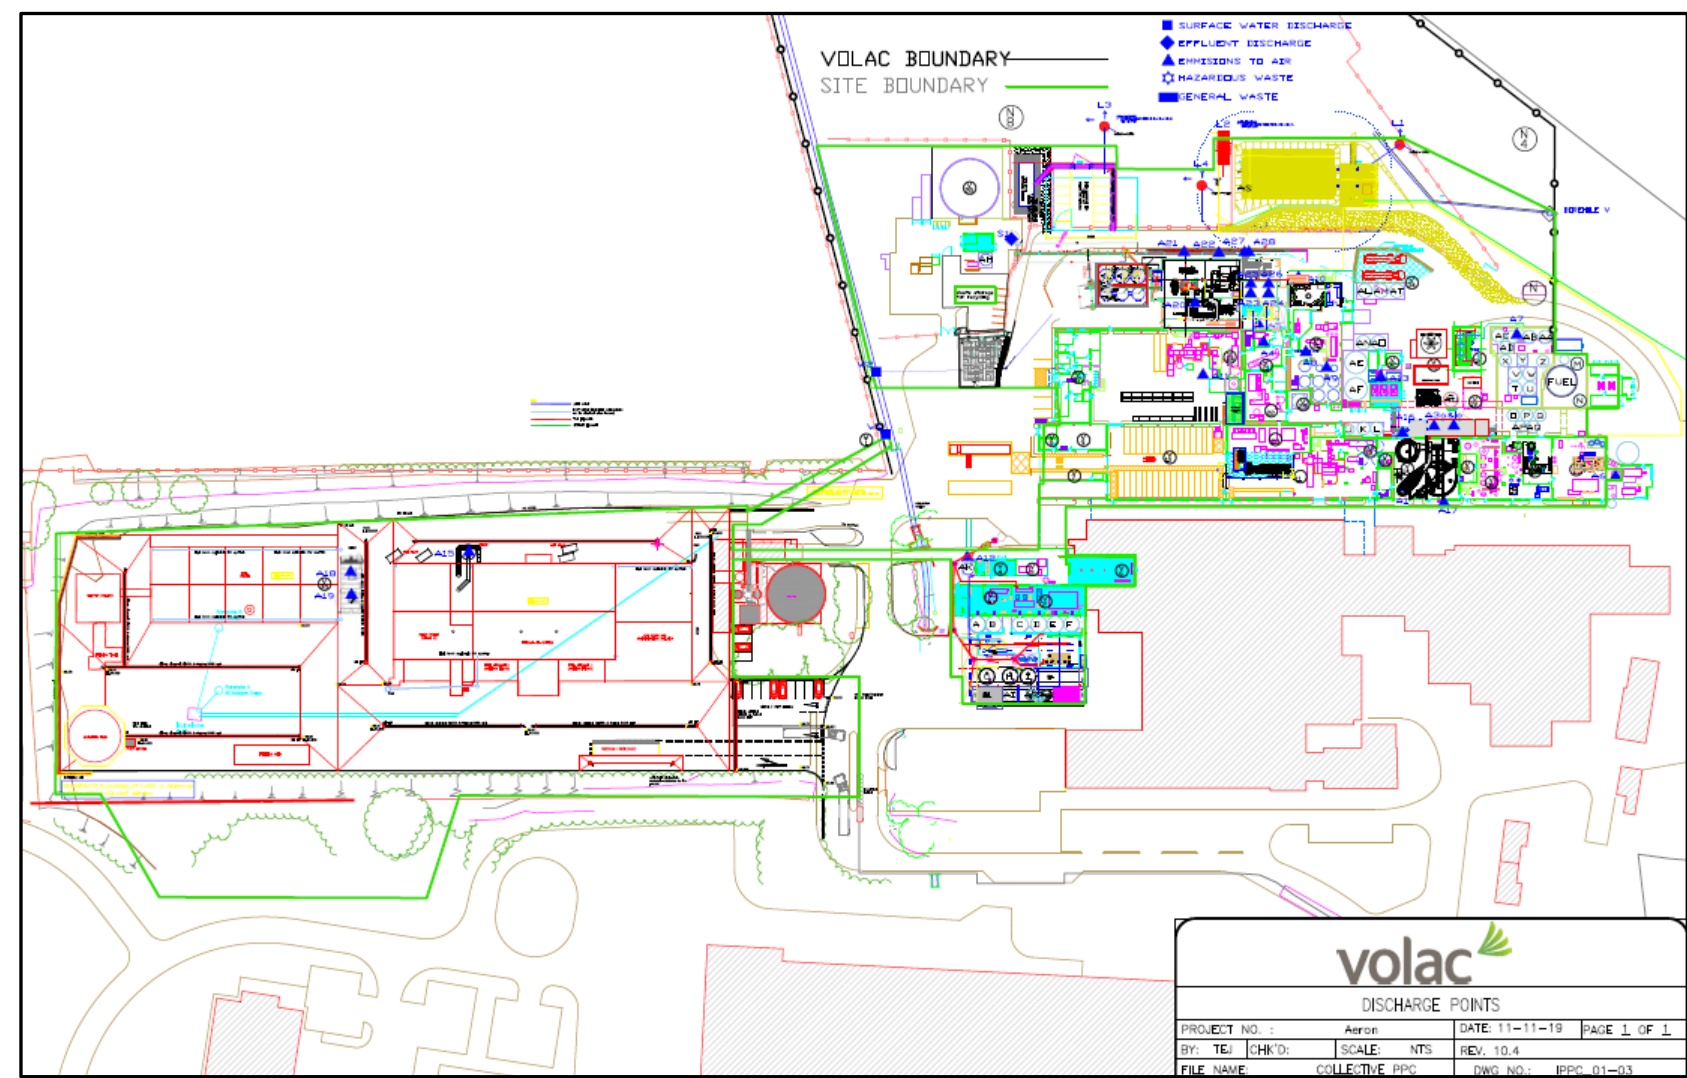

- a) vegetable matter from agriculture and forestry;
- b) vegetable waste from the food processing industry, if the heat generated is recovered;
- c) fibrous vegetable waste from virgin pulp production and from production of paper from pulp, if it is co-incinerated at the place of production and the heat generated is recovered;
- d) cork waste;
- e) wood waste with the exception of wood waste which may contain halogenated organic compounds or heavy metals as a result of treatment with wood preservatives or coating, and which includes in particular such wood waste originating from construction and demolition waste.

“Industrial Emissions Directive” means DIRECTIVE 2010/75/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 24 November 2010 on industrial emissions

Pests” means Birds, Vermin and Insects.

BS EN 14181 is applicable to large combustion plant (LCP) and waste incineration installations (WID) under the international Industrial Emissions Directive standard (IED). For other processes that are not classified as being WID or LCP, the monitoring standards for Continuous Emission Monitoring Systems (CEMS) should follow the principles of BS EN 14181 (i.e. QAL1, QAL2/AST & QAL3); however these procedures may be modified with written agreement from NRW. Further guidance on BS EN 14181, and its application, is contained in Environment Agency Technical Guidance Note M2 – Monitoring of stack emissions to air.
