

Permit Number: **EPR/BP3135EB**

Operator: **Sensient Flavors Ltd & Volac International Ltd**

Facility: **Felinfach Effluent Treatment Plant**

Form Number: **Performance1**

Date of Form: **04/07/14**

**Reporting of other performance indicators for the** January 1<sup>st</sup> 2021 **to** December 31<sup>st</sup> 2021

| Parameter                                | Units          |        |
|------------------------------------------|----------------|--------|
| Treated liquid effluent discharged at W1 | m <sup>3</sup> | 594444 |
| Sludge collected for off-site recovery   | m <sup>3</sup> | 46040  |
| Sodium Hydroxide usage                   | m <sup>3</sup> | 826    |

Operator's comments :

Throughput has increased on last year with lower recovered water volumes than predicted due to difficult operating issues which now have been overcome ..

Sludge collected from site has increased again due to production increases at both sites .A new thickening unit is in operation and sludge disposal is expected to drop by 40%

The past year has been very challenging from a process point due to higher cod loadings coming in but the plant has proved resilient to these challenges. I am glad to report that the past 6 weeks there has been a significant reduction in loading's and the plant is running well within it's capacity.

Signed Byron Williams

Date...28/01/2022.....

(Authorised to sign as representative of Sensient Flavours Limited and Volac International Limited)
