Felinfach Effluent Treatment Plant

Permit number EPR/BP3135EB

Introductory note

This introductory note does not form a part of the permit

The main features of the permit are as follows.

This is a permit variation following the publication of the revised Best Available Techniques (BAT) Reference Document (BREF) for Waste Treatment. The associated BAT conclusions to this document were published on the 17 August 2018 in the Official Journal of the European Union.

This variation incorporates the changes required by the Industrial Emissions Directive following a statutory review of permits in the Waste Treatment sector. These include the amendment of the wording of several permit conditions relating to notifications, changes to emission limits and monitoring requirements. The rest of the installation remains unchanged and continue to be operated as stated in the permit.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.
