Hi Simon,

I would suggest that a marine licence (Band 1, possibly 2) would be required but NRW would need to confirm this. A FRAP would also be needed due to altering of the watercourse.

Bouygues would need to apply for these as the contractor but if we were successful then we'd supply the majority of the paperwork for you to be able to complete these.

Kind Regards

Andy

Hi Andy

Just wondering if you could provide some clarity over the need in Kaymac's professional opinion that a Marine Licence is required for the works on the Sluice Gates, and whether you have applied for a Marine Licence recently with the NRW and can offer any guidance.

Appreciate your thoughts

Cheers

S

Good afternoon Dylan,

I can confirm that works at the tidal sluice will require a marine licence if it is a marine licensable activity. More information can be found on our webpage [here](#).

If you have anymore questions then please let me know.

Many thanks,

Jodie

Hi Simon,

I have plotted the coordinate provided and here is where it is on the map:

Is this correct? The coordinate appears to be near houses, this would be above MHWS. If the coordinate is not in the correct place please send updated coordinates of the works.

Many thanks,

Jodie

Subject: RE: Marine Licencing Assistance for proposed works in/ over and around the New Dafen, Delta Lakes, Llanelli

Good morning Jodie, I hope you are well.

Thankyou for your email from last week...it is much appreciated. So it is of my understanding that there are sluice gates now in place between the New Dafen and the estuary, which would prevent any sea waters coming into the New Dafen, and negate the need for a Marine Licence. Working with Anne, I have now submitted 3 no. FRAP Applications to:

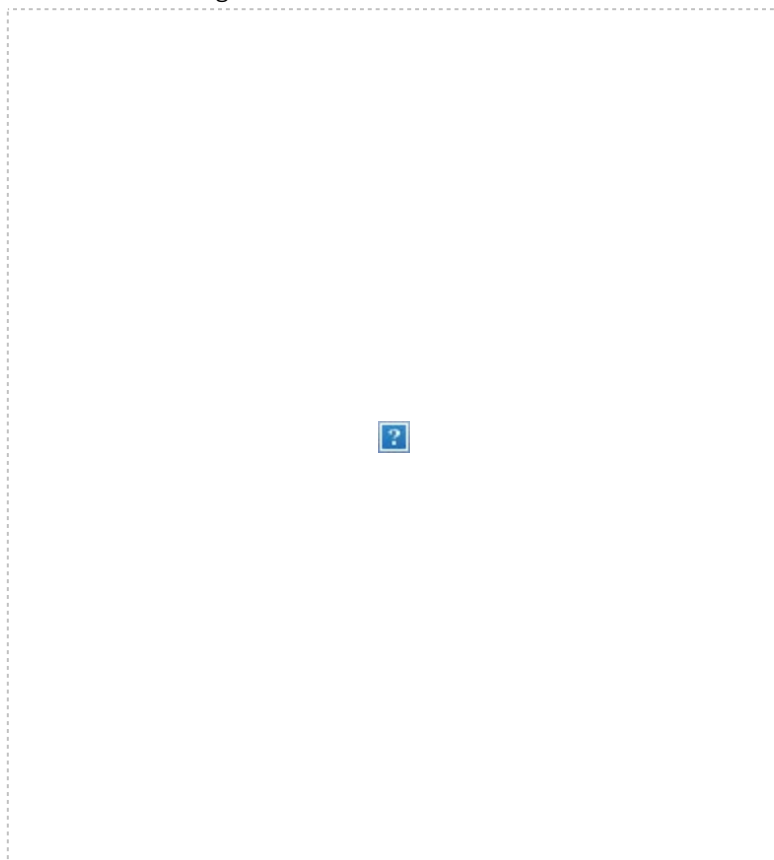

1. Enable survey works on the dock wall;
2. Create water vole habitat around the north edge of the New Dafen;

3. Construction a new surface water outfall from the development.

We have currently put on hold the FRAP for the main development, following Anne's comments last week.

The area of the development that could require Marine Licencing could be the Sluice Gates works – and we are engaging with our preferred contractor for this element of works (Kaymac).

The links unfortunately were not very helpful, to someone who isn't knowledgeable with high waters etc, so I would appreciate it if you could look into whether the area should be covered with a Marine Licensing: The co-ordinates are as follows:

Any assistance you can provide would be very much appreciated.

Kind regards

Simon

Hi Simon,

I apologise that this request was not picked up in April. I will take a look into this for you, as you say below it is not for the marine licensing team to state if the application is seawards of mean high water springs, it is for the applicant to satisfy themselves if a marine licence is required.

However, please take a look at [this](#) website to see if it can provide any information, the use of an OS map could also be used. If you wish, you could also submit coordinates of the works to myself and I can see if I can assist.

If you have any further queries then please get back in touch and I will try and assist further.

Many thanks,

Jodie

Good morning

I am chasing up on an enquiry I submitted back in the middle of April, regarding guidance on the need for a Marine Licence for proposed works in and around the New Dafen, Delta Lakes, Llanelli. I would appreciate if I could have some feedback so that I can advise the project team accordingly with any applications/ fees/ impact to programme please.

Kind regards

Simon

Subject: Marine Licencing Assistance for proposed works in/ over and around the New Dafen, Delta Lakes, Llanelli

Good afternoon

One of your colleagues Anne Thomas has been working with my project team providing guidance on a number of Flood Risk Activity Permit (FRAP) applications that are required for the construction of the Community Health and Wellness Hub in Llanelli that is programmed to commence this year.

In our discussions and site visits, over the past month or so we have determined that a FRAP will be required for the following activities:

1. Construction of the Community Health and Wellness Hub and Associated Works due to its presence within the floodplain – detail in the proposed site plan drawing;
2. New Dafen Dock Wall Survey, and if required remedial works to maintain its structural integrity....working off a pontoon and scaffold tower – concept within the Mythe Intake Demolition Works.
3. Proposed Storm Water Outfall and Section 104 Rising Main due to the location being within 8m of a main river – detail in the stormwater outfall details.
4. Creation of proposed new water vole habitat on the North side of the New Dafen – detail within the landscape masterplan;
5. Proposed works on the Sluice Gates – detail in drawing LWLSV-ARUP-XW-XX-S-6500

In our email exchange yesterday, Anne mentioned that if any of the proposed works are to take place below Mean High Water Springs then a Marine Licence may be required. It is for the applicant to determine if the works are below Mean High Water Springs, guidance on how to do this is found on our website on this link [Natural Resources Wales / Marine licensing](https://naturalresources.wales.gov.uk/marine-licensing). If you have any queries email the marine licencing team directly for assistance on marinelicensing@naturalresourceswales.gov.uk.

So, the purpose of my query is that due to the presence of the Sluice Gates being permanently closed now, that the New Dafen is no longer subject to being tidal, and not affected by the Mean High-Water Springs, and just wondered if you could provide some guidance on this.

I have attached some plans of the project and would welcome any guidance you can provide.

I appreciate your thoughts.

Kind regards

Simon
