Condition 3.19/Cefas Advice Letter/Reference 1950v1 Point 15 Major comment (action): Cefas recommend that sampling and analysis of sediment from within the Middle Quay area is analysed for PAHs in one year's time given the elevated levels observed in comparison to previous sampling, and proximity of the results from Middle Quay A to the ERM for LMW hydrocarbons, as well as consideration of previous exclusions applied to this area based on PAH levels.

Please provide a description of your request e.g. Construction Environment Management Plan submitted for approval prior to commencement of works/ submission of annual monitoring report for approval
