Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

This is an operator led variation to:

- Increase the annual capacity of the process from 55,000 tonnes per annum to 75,000 tonnes per annum
- Make associated changes to the site to accommodate capacity increase (new ABPR waste storage tanks, new non-ABPR waste storage tanks, minor changes to site plan and layout)
- Add an emission point to surface water (W1) for uncontaminated rain water

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
