3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

At this time, we do not intend to take any further action.

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

4. Details of our assessment

This Compliance Assessment Report follows the review of annual returns and monitoring data for 2023.

Annual Emissions Monitoring Air (Form Air1)

The data for the annual monitoring was submitted on 30th January 2024 for emission points A1, A2 and A10 as required by Permit Condition 4.2.3, Schedule 4, Table S4.1 No units were included in the data. Please confirm the units with NRW.

There are no permitted Emission Limit Values (ELVs) for these emission points.

Annual Emissions Monitoring Water (Form Sewer1)

The data was submitted on 30th January 2024 for emission point S1 as required by Permit Condition 4.2.3, Schedule 4, Table S4.1. No units were included in the data. Please confirm the units with NRW.

There are no permitted ELVs for these emission points.

Action

Please update forms A1 and S1 with units for the monitoring results and provide a copy to NRW by 15th March 2024.

Annual Report

The annual report was submitted on 30th January 2024 as required by Permit Condition 4.2.2.

Nitrogen Oxide emissions have increased on all 3 emission points compared to 2022 data.

With reference to water emission point S1 there has been a significant reduction in

Chemical Oxygen Demand (COD) and suspended solids in this discharge and the flow has remained comparable to 2022 which reflects the improvements that have been made to the effluent treatment system.

Water and energy usage has increased from 2022 but energy efficiency per unit output of product has improved in 2023. Food waste per tonne of product has also improved in 2023 compared to 2022.

Although all the data that is required by the permit was supplied there was no interpretative review of the data provided as required in Permit Condition 4.2.2 (a).

Action

For the next annual reporting, to comply with this permit condition, provide an interpretative review of the data.

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.

Important information

Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm of the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action only relating to the activity assessment
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description	Score
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property	60
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property	31
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property	4
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property	0.1

How we use assessment scores

The number and severity of non-compliances recorded in a year will affect your annual subsistence fee the following year. A non-compliance factor is added to your site's Operator

Performance Risk Appraisal (OPRA) score when we calculate your fee to reflect the additional resource we use to assess permit compliance.

If your assessment result in Section 1 is suspended, what does this mean?

In line with our guidance, we may suspend scores for up to six months to allow time for remedial action to be taken. Suspended scores will be re-instated if the action is not completed.
