This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

### 4. Details of our assessment

I attended site for inspection on 29th January 2024, the weather was foggy but mild with intermittent rain showers.

I met Hannah on site, who showed me the facility and provided access. The compound was secure and kept clean/tidy. It was unclear the path of the final discharge from the PTP, however the sample chamber appeared to be clear of visible oil or grease. A sample was taken, which appeared to be relatively clear and the results were well within permitted limits:

- BOD 2.53 mg/l - Permit limit 20 mg/l
- Suspended Solids <3 mg/l - Permit limit 30 mg/l
- Ammoniacal Nitrogen 1.55 mg/l - Permit limit 10 mg/l

After a final conversation with Hannah I then left site approx 14.30.

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.
