

Compliance Assessment Report CAR_NRW0043346

Permit being assessed: AB3591ZQ.

For: Maelor Foods Limited, **held by:** Maelor Foods Limited

At: Maelor Foods Limited, Pickhill Lane, Cross Lanes, Wrexham, Wrexham, LL13 0UE.

Type of assessment: Site Inspection,

Reason: Routine.

On: 07/02/2024 between 09:20 and 11:45.

Parts of permit assessed: See Below.

NRW Lead Officer: Philip Harper, accompanied by Carter Shone.

Report sent to: James Colley, General Manager, on 01/03/2024.

1. Summary of our findings (full details in section 4)

Part of permitted activity assessed (compliance criteria)	Assessment result	Permit condition
IR1A - Management - General management	Ongoing (O)	1.1.1(a)
IR1A - Management - General management	Ongoing (O)	1.1.1(a)

Result types are explained in more detail in the 'Important Information' section below.

Total non-compliances recorded	Total non-compliance score
0	0

How we use the non-compliance score to calculate your annual fee is explained in the 'Important Information' section below.

2. What action is required?

Criteria	Action needed	Complete by
IR1A	See actions in main text	Already completed
IR1A	See actions in main text	Already completed

Compliance criteria codes are listed in the 'Important information' section below.

3. What will happen next?

Any non-compliance we have identified and recorded on this form is an offence. It can result in criminal prosecution and/or suspension or revocation of your permit.

You are non-compliant with your permit.

We are currently considering taking enforcement action against you for the non-compliance recorded above. We will contact you in due course.

4. Details of our assessment

NOTE: Non-compliances against the management system have been identified within this compliance assessment report. Scores against the management system have been consolidated and provided as a single category score 2 in compliance assessment report CAR_NRW0043296.

At 9:30 on the 7th February 2024 Phil Harper and Carter Shone, Senior Industry & Waste Regulation Officers visited Maelor Foods Ltd, Pickhill Lane, Cross Lanes, Wrexham, LL13 0UE. This was an unannounced site visit.

River Dee Outfall Point

Prior visiting the site, officers visited the outfall point for Maelor at the River Dee to observe for effects of increased nutrient loading and pollution at the river. The outfall point was submerged following extended rainfall, therefore, no adverse river effects were observed.

It should be noted that the outfall point will be visited by officers on a regular basis.

Turbidity Probe.

Visual inspection of the control interface found that the connectivity issues at the turbidity probe which were noted during the site inspection on the 25th January 2024 were still being experienced. The operator informed officers that the ETP provider had been contacted regarding a repair or replacement for the probe.

The reading at the probe at the time of the inspection was 13.8 Nephelometric Turbidity Units (NTU), effluent was being discharged to the River Dee.

The operator is reminded that the Emissions Monitoring Plan describes the turbidity as a key data parameter and that 40 days of data will be stored for key parameters. The site currently does not have this utility and is operating in contravention of its management systems.

This is a breach under permit condition 1.1.1(a). A score has been applied in compliance assessment report CAR_NRW0043296.

Action 1: Proceed with repair or replacement of turbidity probe without delay.

Autosampler

Observations regarding the autosampler and composite sample fridge were discussed in detail within compliance assessment report CAR_NRW0043296.

Digital Temperature Display

A digital temperature probe was observed within the composite sample fridge.

Sludge on Site Hardstanding

During the inspection it was observed that a comprehensive clean down had been undertaken on the hardstanding around the main clarifier and the discharge point. Some sludge was still visible on the sides of tanks and other structures.

The odour management plan for the site recognises that decaying sludge has the potential to cause an offsite odour. The continued failure to clean up the spill indicates a continued failure by the operator to adhere to the site's odour management plan, which forms part of the environmental management system.

This is a breach under permit condition 1.1.1(a). A score has been applied in compliance assessment report CAR_NRW0043296.

Removal of Excess Solids from main Clarifier

During the inspection it was noted that the Dolav and pipework which were being used to remove excess solids from the main clarifier had been removed.

Formal Water Sample

A formal sample of the final effluent was taken for analysis. The sample was split to provide a sample which was analysed by Natural Resources Wales (NRW) and a sample for which the operator arranged testing. The available results at the time of writing this compliance assessment report are shown in the table below.

Parameter	Result	Permitted Compliance Limit
Ammonia	0.03 mg/l	5 mg/l
Total suspended solids	40 mg/l	30 mg/l
pH	7.33	6 to 9

Sample data for analysis undertaken by NRW indicates that effluent was outside its compliance limit for total suspended solids.

It should be noted that whilst the level for suspended solids appears to be above its respective compliance limit, the permit describes that this is the limit for a flow proportional daily composite and not for a spot sample as taken on the 7th February 2024. No permit breaches have been applied with regard to the above data.

Kind Regards

Phil Harper

Senior Industry and Waste Regulation Officer NE

If you have any queries about this report, or to discuss completion of any actions, please contact the NRW Officer named above.

Important information

Legal status of this report

Your permit is issued to you under the Environmental Permitting Regulations. You have a responsibility to comply with the conditions of your permit and prevent pollution/harm of the environment. You must also ensure that you comply with any other relevant legislation that may apply to your site's operations.

This report explains the findings of our assessment and any action you are required to take. We categorise non-compliance using our guidance for assessing non-compliance at regulated sites.

When we find potential non-compliance/s we will normally give you advice on how to maintain compliance.

To correct non-compliance, we may:

- require you to take specific actions
- issue a notice
- review the conditions of your permit.

Any advice and guidance we give will be without prejudice to any other enforcement response that we consider may be required.

Assessment results and non-compliance categories (used in section 1):

Assessment result	Description
Assessed (A)	Assessed or assessed in part, no evidence of non-compliance found
Action only (X)	Action only relating to the activity assessment
Ongoing (O)	Ongoing non-compliance, not scored

Non-compliance category	Description	Score
C1 Major	Potential to have a major, serious, persistent and/or extensive impact or effect on the environment, people and/or property	60
C2 Significant	Potential to have a significant impact or effect on the environment, people and/or property	31
C3 Minor	Potential to have a minor or minimal impact or effect on the environment, people and/or property	4
C4 No environmental impact	Non-compliance at a regulated site that cannot foreseeably have any impact on the environment, people and/or property	0.1

How we use assessment scores

The number and severity of non-compliances recorded in a year will affect your annual subsistence fee the following year. A non-compliance factor is added to your site's Operator

Performance Risk Appraisal (OPRA) score when we calculate your fee to reflect the additional resource we use to assess permit compliance.

If your assessment result in Section 1 is suspended, what does this mean?

In line with our guidance, we may suspend scores for up to six months to allow time for remedial action to be taken. Suspended scores will be re-instated if the action is not completed.

Full list of Industry compliance criteria (used in section 1 and 2):

1. Management

- IR1A – General management
- IR1B – Finance (only applicable to Landfill)
- IR1C – Energy efficiency
- IR1D - Efficient use of raw materials
- IR1E - Avoidance, recovery and disposal of wastes produced by the activities
- IR1F - Multiple operator installations

2. Operations

- IR2A – Permitted activities
- IR2B – The site
- IR2C – Operating techniques
- IR2D – Technical requirements
- IR2E – Improvement programme
- IR2F – Pre-operational conditions
- IR2G – Landfill engineering (only applicable to Landfill)
- IR2H – Waste acceptance (only applicable to Landfill)
- IR2I – Leachate levels (only applicable to Landfill)
- IR2J – Closure and aftercare (only applicable to Landfill)
- IR2K – Landfill gas management (only applicable to Landfill)

3. Emission and Monitoring

- IR3A – Emissions to water, air or land
- IR3B – Emissions of substances not controlled by emission limits
- IR3C – Odour
- IR3D – Noise and vibration
- IR3E – Monitoring
- IR3F – Pests
- IR3G – Air quality management plans
- IR3H – Monitoring for the purposes of the Industrial Emissions Directive (this heading includes Large Combustion Plants)
- IR3I – Fire

4. Information

- IR4A – Records
- IR4B – Reporting
- IR4C – Notification

Enforcement response

Any non-compliance with a permit condition is an offence and we may take legal action against you. Action we take can include prosecution, serving a notice on you and/or

suspension or revocation of your permit. See our Enforcement and Sanctions Guidance for further information.

Data protection notice

You should make sure that anyone named in this report knows that the information it contains will be processed by Natural Resources Wales to fulfil its regulatory and monitoring functions and to maintain the relevant public register(s).

We may also use and/or disclose the report in connection with:

- offering or providing you with our literature or services relating to environmental matters
- consulting with the public, public bodies and other organisations (e.g. Health and Safety Executive, local authorities) on environmental issues
- carrying out statistical analysis, research and development on environmental issues
- providing public register information to enquirers
- investigating possible breaches of environmental law
- assessing customer service satisfaction and improving our service
- Freedom of Information Act or Environmental Information Regulations requests.

We may also pass it on to our agents or representatives to do these things on our behalf.

Disclosure of information – this report will be available to view on-line

If you think this report contains commercially confidential information that should not be placed on our public register, you must contact your local Natural Resources Wales office within **fifteen working days** of receiving this report, using the contact details in the accompanying email or letter. You must give a full explanation of why it should not be added to our public register, including specifying which information is commercially confidential. We will assess your request and respond to you within twenty working days to let you know if we agree to your request.

What do I do if I disagree with the report or have a complaint?

If you disagree with this compliance assessment report, you should contact the lead officer without delay to discuss your concerns.

If you are unable to resolve the issue with the lead officer or their line manager you should contact our Customer Contact team on 0300 065 3000 (Monday to Friday 08:00 to 18:00), or email enquiries@naturalresourceswales.gov.uk for details of how to raise your dispute further through our Complaints and Commendations procedure.

If you are dissatisfied with our response, you can contact the Public Services Ombudsman for Wales by phone on 0300 7900203 or by email at ask@ombudsman.wales

Welsh Language Standards

We are committed to establishing Natural Resources Wales as a naturally bilingual organisation. We will provide compliance reports in your preferred language.
