Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

This is an Natural Resources Wales initiated variation of a tier 3 bespoke environmental permit. This variation amends Table S3.1 – Point source emissions to air in Schedule 3 – Emissions and Monitoring (both before and after 13th June 2020). Table S3.1 has been changed due to an error in the reference period requirements for monitoring standard BS EN 14385:2004. The reference period for Lead has been changed from 'Daily average' to 'Periodic' following notification from the operator (email dated 11/04/2018).

Permit condition 4.2.6 has also been removed as the site has no solvent emission reporting requirements. The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
