**At this time, we do not intend to take any further action.**

This statement does not stop us from taking additional enforcement action if further relevant information comes to light or offences continue.

### 4. Details of our assessment

On the 30th of April 2024 NRW Environment Officer Nathan Owen accompanied by SEO Cathrine Kiely visited the Dinmael STW and were accompanied by DCWW's NE Catchment Manager and Operations Supervisor.

#### **Image 1, small crack in Primary tank**

There was a small crack in the primary intake tank, this was allowing a small amount of effluent to seep through and discharge to ground, NRW are requesting that this be remediated by the 30<sup>th</sup> of June 2024.

**Image 2, filter bed with debris**

There was a small amount of debris settled on the filter bed. This type of site has no inlet screen, meaning debris can settle on the filter bed. This should be cleaned off by the site operator when the site is visited weekly.

The distribution arm had settled matter on the arm, which was brushed clean at the time of our visit.

**Image 3, trees growing above works.**

There was evidence that the pine trees growing over the works in times of high wind deposit branches on the filter bed which could impact the works, it is advised the trees are cut back as much as possible to prevent any branches falling on the asset which could impact treatment operations.

NRW would like to thank DCWW for their time on the day
