Permit number

**EPR/XP3833UB**

# **East Bank Road Treatment Facility**

## **Permit number EPR/XP3833UB**

### **Introductory note**

**This introductory note does not form a part of the notice.**

The following notice gives notice of the variation and consolidation of an environmental permit.

G.D. Environmental Services Limited have applied to add eight (No.8) EWC codes (permitted waste types) to the permit, to be accepted and treated under the following existing permitted activities:

- A1 - S5.3 A(1)(a)(iii) Disposal or recovery of hazardous waste in a facility with a capacity exceeding 10 tonnes per day involving blending or mixing prior to submission to any of the other activities listed in this Section or in Section 5.1; and
- A3 - S5.4 A(1) (b) (i) Recovery or a mix of recovery and disposal of non-hazardous waste with a capacity exceeding 75 tonnes per day involving biological treatment.

The new waste types to be added are similar in nature to waste streams already permitted to be accepted onto site, thus no changes are required to the Operators existing operational procedures (including pre-acceptance and on-site waste acceptance procedures). The additional waste streams will not impact on throughput capacity at the site, which will remain 75,850 tonnes per annum for the entire site. The total maximum throughput capacity of hazardous solid waste will remain at 2,000 tonnes per annum with a maximum storage at any one time of 100 tonnes. The total maximum throughput capacity of hazardous liquid waste will remain at 16,000 tonnes per annum with a maximum storage at any one time of 442 tonnes. The total maximum throughput capacity of hazardous waste oil will remain at 22,850 tonnes per annum with a maximum storage at any one time of 442 tonnes. The total maximum throughput capacity of non-hazardous waste will remain at 10,000 tonnes per annum with a maximum storage at any one time of 150 tonnes.

The permit has also been updated to reflect:

- recent change of company registered office address;
- Improvement Conditions listed within Table S1.3 are now acknowledged as deemed complete; and
- Schedule 3(a) and Schedule 4(a) have been removed from the permit, as the effective dates for compliance within these Schedules has since expired and emissions, monitoring and reporting requirements referenced within these schedules are no longer applicable, as the BREF deadline has now passed (Aug 2022).

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

Variation determined ERP/XP3833UB/V012	19/06/2024	Updated and consolidated permit issued to G D Environmental Services Ltd

End of introductory note

## Notice of variation and consolidation

The Environmental Permitting (England and Wales) Regulations 2016

The Natural Resources Body for Wales (“Natural Resources Wales”) in exercise of its powers under regulation 20 of the Environmental Permitting (England and Wales) Regulations 2016 varies and consolidates

Permit number

**EPR/XP3833UB**

issued to

**G.D. Environmental Services Limited** (“the operator”)

whose registered office is

**4a Brecon Court**

**William Brown Close**

**Llantarnam Industrial Park**

**Cwmbran**

**NP44 3AB**

company registration number **04704681**

to operate an installation and waste operation at

**East Bank Road Treatment Facility**

**Units 18a**

**East Bank Road**

**Felnex Industrial Estate**

**Newport**

**NP19 4PP**

to the extent set out in the schedules.

The notice shall take effect from 19/06/2024.

Signed

Date

<b>Holly Noble</b>	<b>19/06/2024</b>
