

## **FMC Environmental Management System**

FMC Ltd based in Flintshire has implemented an environmental management system (EMS) which is based on the Green Dragon Environmental Standard. FMC has well established and documented procedures for all significant processes and operations.

As an organisation, the EMS covers the following:

- A commitment to continual environmental improvement by reviewing its processes and practices and using best available techniques whenever practicable.
- Providing adequate resources to meet all legal requirements and prevent any adverse impact to the environment caused by their activities.
- Allocating roles and responsibilities to its staff to ensure compliance.
- Site management take the lead to ensure that the environmental management system is fully implemented by all personnel.
- Providing suitable training to employees to ensure competence is maintained.
- Maintaining and reviewing all EHS procedures to ensure they are suitable and valid.
- Maintaining effective systems that include, risk assessment, Management of Change (MOC) and the Safety Incident Management System (SIMs).
- Employing effective maintenance programs and systems to ensure the safe operation of all plant and processes.
- Conducting both internal and external auditing of EMS system to ensure its effectiveness.
- Conducting monitoring of emissions as per the site Environmental Permit requirements
