Hi Leigh

Thanks for the call , I can also confirm that we don't normally issue Trade effluent consents for salt water into our network for the same reasons stated in the email below , please ask if the NRW needs to talk to me about it please call me .

Kind regards

Mike Hughes

Hi Mike,

Not sure if you remember our phone call a few years back but I'm Leigh from 360 Aquaculture. We have recently acquired planning permission to build a new fish farm in Neath.

I wanted to ask about a discharge permit we have applied for with NRW for the new farm. The application was submitted last year and NRW have requested more information on why we cannot discharge the waste water from this new farm into the mains sewer. Our structural engineer (cc'd) has spoken with WW and they've confirmed over the phone that they do not want lots of saline water going into the sewer as it compounds the problem they already have with storm water discharge and capacity at works.

Our farm water: 15 ppt salinity

Volume to be discharge/ day: 22.75m3

Would you be able to put something in writing for us to satisfy NRW please? I'd be happy to chat over the phone. My phone number is 07939 118 548

Many thanks,

Leigh
